Ducted Fan Design, Volume 1 Mar 31 2021 *Presents a simplified method of designing ducted fans for light aircraft propulsion. Includes a survey of ducted-fan-powered aircraft, ranging from amateur-built airplanes to military models and prototypes. Detailed discussion of engines and list of suitable powerplants drawn from automobiles, ATVs and personal watercraft. Extensive technical bibliography and list of sources.*

American Marine Engines 1885-1950 Aug 04 2021 *From the first internal combustion engine installation and the craft that took troops ashore on D-Day to the mid-1920s boom in recreational motorboating and beyond, this narrative presents a flawless history of the marine engine field. With an alphabetical listing of approximately 1,000 engine companies in the U.S. and Canada, this in-depth portrait also includes detailed information about founders and products, advice on the most desirable engines, tips on identifying unknown engines, and suggestions for independent research.*
