The Situationist International (SI) was a Paris-based artistic and political avant-garde group that formed in 1957, went through three distinct phases during its existence, and dissolved in 1972. In 1967, SI leader Guy Debord published his book *The Society of the Spectacle*, which presents his theory of how “the Spectacle” (i.e., the Capitalist system in its totality) works endlessly (though not always successfully) to transform people into spectators whose sole purposes are to consume commodities and to live depoliticized, passive, isolated, and contemplative lives. To challenge and subvert “the Spectacle,” Debord and his SI associates theorized and practiced the anti-spectacular critical art they called “detournement,” which entails reusing existing artistic and mass-produced elements to create new combinations or ensembles. As Debord wrote in 1956, detournement has the potential to be “a powerful cultural weapon in the service of real class struggle.” In this edited book, the authors contribute chapters about how they created their own detournements and used them as central audio-visual texts in critical projects that they designed and carried out in a variety of pedagogical situations. Most of the projects involved preservice teachers in teacher education courses, and the anti-spectacular purposes include challenging Hollywood’s problematic representations of Native Americans, subverting the racist stereotypes of Latin@s in a popular children’s book, and critiquing the neoliberal agenda of

the charter school movement. This book offers readers detailed accounts of pedagogical projects that can serve as examples of the critical possibilities of detournement. Jump into the complex and controversial military operation that saw the United States act to topple the regime of dictator Saddam Hussein. When Henry Vizetelly was imprisoned in 1889 for publishing the novels of Émile Zola in English, the problem was not just Zola's French candour about sex - it was that Vizetelly's books were cheap, and ordinary people could read them. Censored exposes the role that power plays in censorship. In twenty-five chapters focusing on a wide range of texts, including the Bible, slave narratives, modernist classics, comic books, and Chicana/o literature, Matthew Fellion and Katherine Inglis chart the forces that have driven censorship in the United Kingdom and the United States for over six hundred years, from fears of civil unrest and corruptible youth to the

oppression of various groups - religious and political dissidents, same-sex lovers, the working class, immigrants, women, racialized people, and those who have been incarcerated or enslaved. The authors also consider the weight of speech, and when restraints might be justified. Rich with illustrations that bring to life the personalities and the books that feature in its stories, Censored takes readers behind the scenes into the courtroom battles, legislative debates, public campaigns, and private exchanges that have shaped the course of literature. A vital reminder that the freedom of speech has always been fragile and never enjoyed equally by all, Censored offers lessons from the past to guard against threats to literature in a new political era.

The Space Studies Board (SSB) was established in 1958 to serve as the focus of the interests and responsibilities in space research for the National Academies. The SSB provides an independent, authoritative forum for information and advice on all aspects of

space science and applications, and it serves as the focal point within the National Academies for activities on space research. It oversees advisory studies and program assessments, facilitates international research coordination, and promotes communications on space science and science policy between the research community, the federal government, and the interested public. The SSB also serves as the U.S. National Committee for the International Council for Science Committee on Space Research (COSPAR). This volume reviews the organization, activities, and reports of the SSB for the year 2010. Each Q&A contains 50 questions on topics commonly found on exam papers, with answer plans and comprehensive suggested answers. The titles are written by lecturers who are also examiners, so the student gains an important insight into exactly what examiners are looking for.

Literature and Language Teaching is for teachers and trainers who want to incorporate literature into the language classroom. The book can be used as a resource by trainers working with groups of teachers, by teacher development groups or by teachers working on their own. Literature and Language Teaching contains tasks and activities which:

- " encourage reflection on some of the issues and debates involved in using literature in the language classroom "
- " explore different approaches to using literature with teenage and adult learners at all levels "
- " suggest criteria for selecting and evaluating materials for classroom use"
- " identify some of the distinctive features of novels, short stories, poems and plays so that these can be successfully exploited in the classroom "
- " provide a wide range of practical ideas and activities for developing materials which teachers can use with their own learners "
- " encourage the observation and assessment of lessons using literacy texts "
- " draw on literary texts in English by a variety of authors from all over the world

Each section of the book is designed to be self-contained so that users of the book can select what is most relevant to their purpose. A key to the tasks and activities is

provided, as well as guidelines for teacher trainers which suggest different ways of using the activities in the book as part of a training programme. Ages 6 to 9 years. Celebrate the Vancouver 2010 Olympic Games with fun and thought provoking activities. Students learn about Vancouver, as well as Olympic history, traditions, and the sports that will be played. NTSE 10 Year-wise Class 10 Stage 2 Solved Papers (2010 - 19) consists of past 10 years Solved papers of Stage 2 (2010 -2019). The book provides solutions to each and every questions immediately after the question paper. Analyze data like a pro, even if you're a beginner. Practical SQL is an approachable and fast-paced guide to SQL (Structured Query Language), the standard programming language for defining, organizing, and exploring data in relational databases. Anthony DeBarros, a journalist and data analyst, focuses on using SQL to find the story within your data. The examples and code use the open-source database PostgreSQL and its companion pgAdmin interface, and the concepts you learn will apply to most database management systems, including MySQL, Oracle, SQLite, and others.\* You'll first cover the fundamentals of databases and the SQL language, then build skills by analyzing data from real-world datasets such as US Census demographics, New York City taxi rides, and earthquakes from US Geological Survey. Each chapter includes exercises and examples that teach even those who have never programmed before all the tools necessary to build powerful databases and access information quickly and efficiently. You'll learn how to:

- Create databases and related tables using your own data
- Aggregate, sort, and filter data to find patterns
- Use functions for basic math and advanced statistical operations
- Identify errors in data and clean them up
- Analyze spatial data with a geographic information system (PostGIS)
- Create advanced queries and automate tasks

This updated second edition has been thoroughly revised to reflect the latest in SQL features, including additional advanced query techniques for wrangling data. This edition also has two

new chapters: an expanded set of instructions on for setting up your system plus a chapter on using PostgreSQL with the popular JSON data interchange format. Learning SQL doesn't have to be dry and complicated. Practical SQL delivers clear examples with an easy-to-follow approach to teach you the tools you need to build and manage your own databases. \* Microsoft SQL Server employs a variant of the language called T-SQL, which is not covered by Practical SQL. Volume is indexed by Thomson Reuters CPCI-S (WoS). This collection of over 500 peer-reviewed papers presents new research results on environment-friendly materials and environmental management. It aims to bring together researchers, developers and users from around the world, working in both industry and academia, in order to share state-of-the-art results, to explore new areas of research and development and to discuss the emerging issues facing environment-friendly materials and environmental management. The work presents important new perspectives on this ever more essential field. Have the diplomatic efforts of the Obama administration toward Iran failed? Was the Bush administration's emphasis on military intervention, refusal to negotiate, and pursuit of regime change a better approach? How can the United States best address the ongoing turmoil in Tehran? This book provides a definitive and comprehensive analysis of the Obama administration's early diplomatic outreach to Iran and discusses the best way to move toward more positive relations between the two discordant states. Trita Parsi, a Middle East foreign policy expert with extensive Capitol Hill and United Nations experience, interviewed 70 high-ranking officials from the U.S., Iran, Europe, Israel, Saudi Arabia, Turkey, and Brazil—including the top American and Iranian negotiators—for this book. Parsi uncovers the previously unknown story of American and Iranian negotiations during Obama's early years as president, the calculations behind the two nations' dealings, and the real reasons for their current stalemate. Contrary to prevailing opinion, Parsi contends that

diplomacy has not been fully tried. For various reasons, Obama's diplomacy ended up being a single roll of the dice. It had to work either immediately—or not at all. Persistence and perseverance are keys to any negotiation. Neither Iran nor the U.S. had them in 2009. 9PPChe2010to2017 Bachelor Thesis from the year 2012 in the subject Medicine - Public Health, grade: 8,4, Maastricht University (Faculty for Health, Medicine and Life Sciences), language: English, abstract: According to Eurostat statistics, the proportion of elderly people in Europe is increasing immensely. While fewer children are born, death is prolonged and people become older. This scenario of demographic changes in the western world raises questions to which answers are rather unclear, as for instance: Who will care for the elderly and how will this look like? The answer to this question may be ambient assisted living (AAL), a branch of information and communication technologies (ICT) aiming at keeping elderly persons as independent as possible in their familiar surroundings in order to postpone hospitalization. The EU plays a major role in developing AAL solutions and enhancing research in the area of ICT, as depicted by the 6th framework programme 2002-2006 or the EU's e-inclusion policy featuring the Digital Agenda 2010, just to name examples (European Commission, 2002; 2007; 2010). However, it remains questionable which challenges AAL - seen as an innovation - faces. The aim of the research in this thesis is to present the field of AAL with relation to home care. Furthermore, the work of the European Union (EU) in the field of AAL is presented, as the EU is a major key player in enhancing research on AAL solutions that help meeting the demands of the future. Moreover, a categorization scheme of AAL solutions is developed through research evidence. Eventually, knowledge and evidence from the research conducted is used to give recommendations for the future concerning the diffusion of AAL and research directions. In order to answer the research question and the objectives, the thesis first presents the theoretical framework that is used for the research, i.e. the Diffusion of Innovations Theory.

Thereafter, a chapter on the methodology follows, which is characterized by a dual nature, as it involves a document analysis and a systematic literature review. Subsequently, the paper presents the results of the research, divided into EU actions and initiatives and ambient assisted living at a glance with categorizations of its types and related challenges. Finally, the last chapter discusses the findings, answers the research question and gives recommendations on how the diffusion of AAL can be enhanced.
