“Twilight in Hazard paints a more nuanced portrait of Appalachia than Vance did...[Maimon] eviscerates Vance's bestseller with stiletto precision.” —Associated Press From investigative reporter and Pulitzer Prize finalist Alan Maimon comes the story of how a perfect storm of events has had a devastating impact on life in small town Appalachia, and on the soul of a shaken nation . . . When Alan Maimon got the assignment in 2000 to report on life in rural Eastern Kentucky, his editor at the Louisville Courier-Journal told him to cover the region “like a foreign correspondent would.” And indeed, when Maimon arrived in Hazard, Kentucky fresh off a reporting stint for the New York Times’s Berlin bureau, he felt every bit the outsider. He had landed in a place in the vice grip of ecological devastation and a corporate-made opioid epidemic—a place where vote-buying and drug-motivated political assassinations were the order of the day. While reporting on the intense religious allegiances, the bitter, bareknuckled political rivalries, and the faltering attempts to emerge from a century-long coal-based economy, Maimon learns that everything—and nothing—you have heard about the region is true. And far from being a foreign place, it is a region whose generations-long struggles are driven by quintessentially American forces. Resisting the easy clichés, Maimon’s Twilight in Hazard gives us a profound understanding of the region from his years of careful reporting. It is both a powerful chronicle of a young reporter’s immersion in a place, and of his return years later—this time as the husband of a Harlan County coal miner’s daughter—to find the area struggling with its identity and in the thrall of Trumpism as a political ideology. Twilight in Hazard refuses to mythologize Central Appalachia. It is a plea to move past the fixation on coal, and a reminder of the true costs to democracy when the media retreats from places of rural distress. It is an intimate portrait of a people staring down some of the most pernicious forces at work in America today while simultaneously being asked: How could you let this happen to yourselves? Twilight in Hazard instead tells the more riveting, noirish, and sometimes bitingly humorous story of how we all let this happen. The book explains the UK tax system and taxation regulations, income tax, employment tax, national insurance contributions, self assessment, corporation tax and others. 'International Financial Reporting' delivers a focused, user-friendly introduction to international financial reporting and how to implement the IASB standards for undergraduate students. With more than 140 countries in the world now using international financial reporting standards (IFRSr Standards), knowledge of the standards issued by the International Accounting Standards Board (IASBr) is vital to students' success in financial accounting. Melville's International Financial Reporting employs a practical, applied approach in exploring and explaining the key international standards. With a focus on how to implement the standards, this text delivers a focused, user-friendly introduction to international financial reporting. Renowned for clear and concise language, this seventh edition brings the book completely up-to-date with international standards issued as of 1 January 2019. An essential American dream—equal access to higher education—was becoming a reality with the GI Bill and civil rights movements after World War II. But this vital American promise has been broken. Christopher Newfield argues that the financial and political crises of public universities are not the result of economic downturns or of ultimately valuable restructuring, but of a conservative campaign to end public education’s democratizing influence on American society. Unmaking the Public University is the story of how conservatives have maligned and restructured public universities, deceiving the public to serve their own ends. It is a deep and revealing analysis that is long overdue. Newfield carefully describes how this campaign operated, using extensive research into public university archives. He launches the story with the expansive vision of an equitable and creative America that emerged from the post-war boom in college access, and traces the gradual emergence of the anti-egalitarian “corporate university,” practices that ranged from racial policies to research budgeting. Newfield shows that the culture wars have actually been an economic war that a conservative coalition in business, government, and academia have waged on that economically necessary but often independent group, the college-educated middle class. Newfield’s research exposes the crucial fact that the culture wars have functioned as a kind of neutron bomb, one that pulverizes the social and culture claims of college grads while leaving their technical expertise untouched. Unmaking the Public University incisively sets the record straight, describing a forty-year economic war waged on the college-educated public, and awakening us to a vision of social development shared by scientists and humanists alike. This edition brings the book completely up to date with the provisions of the Finance Act 2017, including: • Making Tax Digital (MTD) • Revised Budget timetable • Income tax in Scotland • Cash basis for property businesses • Employee shareholder status • Taxation of termination payments • The cash basis threshold • Enabler penalties • Reform of corporate loss relief • Corporate interest expense restriction • IHT main residence nil-rate band • Deemed domicile This book will be of value to both undergraduate and professional students of business and accounting, and will be particularly useful for students preparing for the following examinations: ICAEW Certificate Level, Principles of Taxation; ACCA Fundamentals Level, Taxation; ACCA Technician Scheme, Foundations in Taxation; CIPFA Diploma Stage, Taxation; AAT Professional Diploma, Personal Tax and Business Tax; ATT Certificates, Personal Taxation; Business Taxation and Accounting Principles; AIA Foundation Level, Auditing and Taxation; IFA Level 4, Tax for SMEs. Brilliant and engagingly written, Why Nations Fail answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America’s best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson’s breakthrough ideas on the interplay between inclusive political and economic institutions? Why Nations Fail will change the way you look at—and understand—the world. Making the Modern American Fiscal State chronicles the rise of the US system of direct and progressive taxation. From Preface: This text has a clear European foundation and an international appeal. In line with the globalisation of logistics, we have included cases from other parts of the world than Europe - diverse though European logistics solutions are - including South Africa, the United States, Japan, China and Australia. Accordingly, we start in Part One with the strategic role of logistics in the supply chain. We continue by developing the marketing perspective by explaining our view of 'putting the end-customer first'. Part One finishes by exploring the concept of value and logistics costs. In Part Two, we review leveraging logistics operations in terms of their global dimensions, and of the lead-time frontier. Part Two continues by examining the challenges of coordinating manufacturing and retail processes, and the impact on logistics of just-in-time and the agile supply chain. Part Three reviews working together, first in terms of integrating the supply chain and second in terms of sourcing and supply management. Our book ends with Part Four, in which we outline the logistics future challenge. This text is intended for MSc students on logistics courses, and as an accompanying text for open learning courses such as global MSc degrees and virtual universities. It will also be attractive as a management textbook and as recommended reading on MBA options in logistics and supply chain management. This book is written with an emphasis on the meaning and purpose of accounting as much as the numerical content, matching the specification of many specialist, non-specialist and professional courses which take this approach. The book provides an excellent introduction to financial accounting and uses numerical content to illustrate key concepts and techniques. This is a key textbook for specialist students of accounting and finance, either undergraduate or professional, taking a first course in auditing. In this fourth edition the authors continue to provide a refreshing, imaginative and thorough introduction to the audit process, with a rational and coherent foundation for the

appreciation of auditing practice. This Revised ISA edition is entirely up to date with changes post-Enron, with new international auditing standards and IFRS replacing UK accounting standards for the first time. With the aid of numerous examples, case studies and questions, The Audit Process: Principles, Practice and Cases provides a realistic and thought-provoking insight into the individual components of the auditing process in the context of the entire audit. A major strength of the book is its questioning approach, designed to encourage the student to interact with the material. This volume addresses the core topic areas in corporate finance and establishes an integrated understanding of the three decision areas in finance - investment, financing, and the dividend decision. This book explains the fundamentals of financial planning, including budgeting and managing debt, before engaging with major issues and life events where financial literacy is key. Pedagogical features including learning objectives, terminology boxes, and examples fully support students in developing their practical skills, whilst ponder points and questions encourage the application of these skills when making informed financial decisions. Engaging case studies and extensive examples throughout the text bring the subject to life. What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." –Jonathan Yardley, The Washington Post Book World A reliable and comprehensive guide for students taking a first level course in taxation, business and accounting, featuring a wealth of practical examples.
