This book for the classical guitar has been compiled to improve sight reading, an often neglected aspect of musicianship. With the guitar, musical components (scales, chords, arpeggios, etc.) may often be played in various positions. While this is one of the reasons that the instrument produces such colorful and interesting timbres, it also contributes to the difficulties of sight reading. It is important to develop facility in reading, recognizing the notes, as well as the bar positions in which to play them, the fingerings, the rhythmic patterns, and any markings if interpretation (dynamics, phrasing, articulation, etc.). This book provides an orderly and systematic approach to the study of sight reading, based upon standards for sight reading for the classical guitar found in respected schools around the world. BASIC covers note names, time values, time signatures, major and minor scales (up to four sharps or flats), intervals above a given note, root position triads, key recognition, simple transposition, musical terms and signs -- INTERMEDIATE adds double sharps and flats, irregular groupings of rhythms, all major and minor scales, interval inversions, transposition in major keys, perfect and plagal cadences -- ADVANCED adds alto and tenor clefs, mixed meters, chromatic scales, dominant sevenths, imperfect cadences, intervals above and below a given note and inversions, writing in open score, musical terms in French, German and Italian.
