Dependable Networks and Services Jul 17 2022 This book constitutes the refereed proceedings of the 6th IFIP WG 6.6 International Conference on Autonomous Infrastructure, Management, and Security, AIMS 2012, held in Luxembourg in June 2012. The 10 full papers presented were carefully reviewed and selected from 23 submissions. They cover autonomic and distributed management, network security, network monitoring, and special environments and Internet of Things. In addition, this book contains 9 workshop papers which were selected from 18 submissions. They deal with high-speed networks and network management, intrusion detection, and network monitoring and security.

Implementing Effective Travel Demand Management Measures Feb 24 2023 Travel Demand Management (TDM) describes a wide range of actions that are geared toward improving the efficiency of travel demand. There is much controversy and speculation as to the strength, role, and validity of TDM solutions. This uncertainty has probably led to misunderstandings of the role and potential of TDM, and therefore, a lower yield from TDM approaches than appears to be possible. This report is the main product of a study that was sponsored by the Federal Highway Administration to try to set the facts straight and provide the most comprehensive, accurate, and useable guidance on TDM. The report provides a set of materials, statistics, guides and tools that should be of significant value in not only increasing the basic understanding of what TDM is, but on how to design and evaluate programs which will deliver the optimal that these strategies can offer.
