Guerrilla Television May 18 2020 This book presents ways to break the stranglehold of broadcast television on the American mind by using low-cost portable video-tape cameras, video cassettes, and cable television to design alternative television networks that favor portability and decentralization. The author's contention is that politics are obsolete and that information tools and tactics are a more powerful means of social change. To achieve true democracy, the author suggests that we develop a sense of media ecology in what he calls "media America," or the information environment. This is the first manual or how-to book for new media tools.

The Book of Nothing Jan 18 2023 What conceptual blind spot kept the ancient Greeks (unlike the Indians and Maya) from developing a concept of zero? Why did St. Augustine equate nothingness with the Devil? What tortuous means did 17th-century scientists employ in their attempts to create a vacuum? And why do contemporary quantum physicists believe that the void is actually seething with subatomic activity? You'll find the answers in this dizzyingly erudite and elegantly explained book by the English cosmologist John D. Barrow. Ranging through mathematics, theology, philosophy, literature, particle physics, and cosmology, *The Book of Nothing* explores the enduring hold that vacuity has exercised on the human imagination. Combining high-wire speculation with a wealth of reference that takes in Freddy Mercury and Shakespeare alongside Isaac Newton, Albert Einstein, and Stephen Hawking, the result is a fascinating excursion to the vanishing point of our knowledge.

***This Is Herman Cain!* Apr 28 2021 When Herman Cain speaks, people listen. When he debates, he wins. If you care about the future of America, you have heard of the down-to-earth political newcomer running for president, the straight-talking man of the people with blunt assessments of what America needs. Originally overlooked by mainstream politicians and media, Herman Cain is truly a candidate from "outside the Beltway," but no longer one who is being ignored. BUT WHO IS HE? While Herman Cain has been the host of a popular conservative Atlanta-area radio talk show called *The Herman Cain Show*, a different name originally captured American interest. As CEO, Herman Cain transformed Godfather's Pizza from a company teetering on the verge of bankruptcy into a household word. Cain—as those with an interest in commonsense solutions to political problems will remember—is also famous for using the language and logic of everyday business to expose the fallacies inherent in Clinton assumptions about "Hillarycare" during a 1994 televised town hall meeting. WHAT IS HIS STORY? Herman Cain's rise is the embodiment of the American dream. His parents, Luther and Lenora Cain, made a living the only way black people could in the '40s and '50s. Luther held down three jobs, including being a chauffeur; Lenora cleaned houses. They had two big dreams: to buy a house and to see their sons graduate from college. With dedication and hard work, they made both these dreams come true. In this thrilling memoir, Herman Cain describes his past and present . . . and the future he is determined to create, a future that will put our country back on track. His message resonates because he describes the American reality, and his down-to-earth personal tale of**

hope and hard work is both unforgettable and inspirational. * What is it in my DNA that years ago prompted me to forgo the ease of cruise control and take on the enormous challenge of doing my part toward making America a better place for my granddaughter and the generations to come? Why do I, a son of the segregated South, refuse to think of myself as a “victim” of racism? What is it that motivates me to insist on defining my identity in terms of “ABC”—as being American first, black second, and Conservative third? Just who is Herman Cain? And how did I get this way? Just a hint: it may have had something to do with lessons learned from my parents, Lenora and Luther Cain, Jr. —From This Is Herman**

***The Invisible Heart* Jul 12 2022 A lively, unorthodox look at economics, business, and public policy told in the form of a novel. A love story that embraces the business and economic issues of the day? The Invisible Heart takes a provocative look at business, economics, and regulation through the eyes of Sam Gordon and Laura Silver, teachers at the exclusive Edwards School in Washington, D.C. Sam lives and breathes capitalism. He thinks that most government regulation is unnecessary or even harmful. He believes that success in business is a virtue. He believes that our humanity flourishes under economic freedom. Laura prefers Wordsworth to the Wall Street Journal. Where Sam sees victors, she sees victims. She wants the government to protect consumers and workers from the excesses of Sam's beloved marketplace. While Sam and Laura argue about how to make the world a better place, a parallel story unfolds across town. Erica Baldwin, the crusading head of a government watchdog agency, tries to bring Charles Krauss, a ruthless CEO, to justice. How are these two dramas connected? Why is Sam under threat of dismissal? Will Erica Baldwin find the evidence she needs? Can Laura love a man with an Adam Smith poster on his wall? The answers in *The Invisible Heart* give the reader a richer appreciation for how business and the marketplace transform our lives.**

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. Community Feb 07 2022 Most of our communities are fragmented and at odds within themselves. Businesses, social services, education, and health care each live within their own worlds. The same is true of individual citizens, who long for connection but end up marginalized, their gifts overlooked, their potential contributions lost. What keeps this from changing is that we are trapped in an old and tired conversation about who we are. If this narrative does not shift, we will never truly create a common future and work toward it together. What Peter Block provides in

this inspiring new book is an exploration of the exact way community can emerge from fragmentation. How is community built? How does the transformation occur? What fundamental shifts are involved? What can individuals and formal leaders do to create a place they want to inhabit? We know what healthy communities look like—there are many success stories out there. The challenge is how to create one in our own place. Block helps us see how we can change the existing context of community from one of deficiencies, interests, and entitlement to one of possibility, generosity, and gifts. Questions are more important than answers in this effort, which means leadership is not a matter of style or vision but is about getting the right people together in the right way: convening is a more critical skill than commanding. As he explores the nature of community and the dynamics of transformation, Block outlines six kinds of conversation that will create communal accountability and commitment and describes how we can design physical spaces and structures that will themselves foster a sense of belonging. In Community, Peter Block explores a way of thinking about our places that creates an opening for authentic communities to exist and details what each of us can do to make that happen.

Jersey Shore Impressionists Dec 05 2021 Water and light have seduced artists through the years and the quality of these elements at the New Jersey Shore continues to attract artists to this day. Between the late 1800s and 1940, an inspired group of painters were drawn to the New Jersey coastline, forming communities of artists. *Jersey Shore Impressionists* breaks new ground in the history of American art by recognizing the distinct influence of New Jersey and its Shore on impressionist era American painters. This book establishes ĩ for the first time ĩ a category of impressionist American painters who focused on, or were profoundly influenced by, the landscapes and seascapes of this Shore ĩ from Sandy Hook and Highlands to the Barnegat Bay region to Cape May. ĩNot since 1964, nearly 50 years ago, and only once before that in 1938 has there been published a book on painters in New Jersey,ĩ says the book's author, Roy Pedersen. ĩNever until now has there appeared a survey of the regional impressionist painters of New Jersey.ĩ *Jersey Shore Impressionists* is produced in conjunction with an exhibition at the Morven Museum & Garden in Princeton, NJ., which seeks to examine how the New Jersey shore was home to artist colonies whose output rivaled that of the better-known colonies of Old Lyme and Cos Cob, Connecticut, and Bucks County, Pennsylvania. In a Foreword, Richard J. Boyle, former director of the Pennsylvania Academy of the Fine Arts, describes the

foundation of art colonies, and how they traveled from origins in mid-nineteenth century France to the plein-air attraction of the Jersey Shore's unique light. The first art colony is at Manasquan and forms around 1880 as young artists fresh from European training in Germany, France and Italy begin to arrive, and the book includes work from these artists including Will Hicok Low, Theodore Robinson, Albert Grantley Reinhart, Charles Freeman and Caroline Coventry Haynes. The next generation including Edward Boulton, Ida Wells Stroud, Julius Golz who trained in America, join and form new colonies to paint the unique light as well as the activities of the Shore. The passionate work created by these artists stands as an important, but unsung, chapter of American Impressionism and is celebrated in this book, establishing the important contribution to American art in general, and New Jersey's cultural heritage in particular.

***From the Folks Who Brought You the Weekend* Mar 08 2022** Newly updated: "An enjoyable introduction to American working-class history."—The American Prospect Praised for its "impressive even-handedness", *From the Folks Who Brought You the Weekend* has set the standard for viewing American history through the prism of working people (Publishers Weekly, starred review). From indentured servants and slaves in seventeenth-century Chesapeake to high-tech workers in contemporary Silicon Valley, the book "[puts] a human face on the people, places, events, and social conditions that have shaped the evolution of organized labor", enlivened by illustrations from the celebrated comics journalist Joe Sacco (Library Journal). Now, the authors have added a wealth of fresh analysis of labor's role in American life, with new material on sex workers, disability issues, labor's relation to the global justice movement and the immigrants' rights movement, the 2005 split in the AFL-CIO and the movement civil wars that followed, and the crucial emergence of worker centers and their relationships to unions. With two entirely new

chapters—one on global developments such as offshoring and a second on the 2016 election and unions' relationships to Trump—this is an “extraordinarily fine addition to U.S. history [that] could become an evergreen . . . comparable to Howard Zinn’s award-winning *A People’s History of the United States*” (Publishers Weekly). “A marvelously informed, carefully crafted, far-ranging history of working people.”
