Bestselling author Nicholas Ind and cross-cultural communications expert Rune Bjerke expose the flaws in a marketing-led approach to brand-building, and offer in its place a highly-participative, organization-wide process that delivers fulfillment to employees and value to customers. Drawing on a wide range of sources, they show that the key to a participatory approach is that customers and other external audiences must join managers and employees as active participants in defining and developing the brand. This requires the relationship between organization and customer to be one of trust, respect and authenticity. Incidents involving rescue from road vehicles are dramatically increasing in frequency. There are some 3500 deaths on the road each year, with 35,000 serious injuries. Chapters cover: vehicle design and construction; dealing with incidents; safety procedures; operational procedures; extrication equipment; medical considerations and trauma care; Integrated Personal Development System (I.P.D.S.). Appendices cover: Highways Agency/Fire and Rescue Service memorandum of understanding; training and general information; and emergency

services personnel (ESP) aide mémoire. The CD-ROM, "Vehicle extrication techniques", is a multi media guide to rescue tool handling and extrication techniques.
