This second volume completes the history of the aircraft by describing the improved Mark 2 that was primarily conceived to carry Britains Blue Steel nuclear deterrent. The aircraft was to be re-engined with the Rolls-Royce Conway and the enlargement of the air intakes in the wing are one of the more noticeable external differences on these models. When the V-Bomber Force lost its primary raison detre as the delivery vehicle for the nuclear deterrent, the Victors were adapted for the air-to-air refueling tanker role, a task they successfully carried out until their airframe life was exhausted. This volume also includes lengthy appendices on all Marks that include a mass of detailed historical information, the testing of many new systems, modifications throughout service life, the authors first-hand experiences as a Victor crew chief, operational records and a complete list of all Victor accidents with a detailed analysis and official reports.
