(Author). This publication prescribes guidance for leaders and crewmen of mortar squads. It concerns mortar crew training, and it is used with the applicable technical manuals (TMs) and Army Training and Evaluation Programs (ARTEPs). It presents practical solutions to assist in the timely delivery of accurate mortar fires, but does not discuss all possible situations. Local requirements may dictate minor variations from the methods and techniques described herein. However, principles should not be violated by modification of techniques and methods. The scope of this publication includes mortar crew training at the squad level. The 60-mm mortar, M224; 81-mm mortar, M252; and 120-mm mortars, M120/M121 are discussed, to include nomenclature, sighting, equipment, characteristics, capabilities, and ammunition. TM 3-34.44 is primarily a training guide and reference text for engineer personnel using concrete and masonry materials in field construction. The manual has two parts: Concrete (Part One) and Masonry (Part Two). Part One covers the physical characteristics, properties, and ingredients of concrete; mixtures, design and construction of forms; and with reinforced concrete and field construction procedures. Part Two addresses the mason's tools and equipment as well as the physical characteristics and properties of concrete blocks, bricks, and structural clay tiles. It further explains construction procedures and methods for these masonry units. Appendix A contains an English to metric measurement conversion chart. This publication supersedes FM 5-428, 18 June 1998. List of members in v. 7-15, 17, 19-20. This study manual determines the role and importance of technical installation of shops, department stores and others trade organizations. Trade organization is considered as an object of technical installation. There are classifications of commercial equipment: uncooled commercial equipment and cooled commercial equipment in this study manual. Also the features of management of trade enterprise as a property complex are analyzed here. The study manual is intended for students, undergraduates studying in the following areas: "Trading", "Commerce", "Management in retail" and other areas. Also, the materials are of interest to retail managers.
