"The Hack Mechanic") wandered waaaay outside of his German car comfort zone and blew the advance from his first book on a car that captivated him as an adolescent-a 1974 Lotus Europa Twin Cam Special. The car hadn't been on the road since 1979, had a seized engine, and was purchased sight-unseen, but it was complete and had only 24,000 miles on it. In the week after it arrived, Rob feverishly ripped out the drivetrain, but the project soon ran into molasses due to the fact that all options for rebuilding or replacing the low-production Lotus-Ford Twin Cam engine would've cost more than he'd paid for the car. It was six years before the car was running, during which Rob lost his job and changed careers, necessitating that if work on the Lotus proceeded at all, costs needed to be relentlessly contained. All of this was chronicled on Facebook in a series of posts titled "The Lotus Chronicles," in which Rob's friends and acquaintances-the Hack Mechanic faithful-chimed in on the process, offering advice, encouragement, ridicule, scorn, every Lucas joke known to man and woman, and insight on why Lotus really does stand for "lots of trouble, usually serious."The Lotus Chronicles is a collection of those posts, woven together with sections providing context and perspective. It's about passion, perseverance, the balance between "doing it right" and getting 'er done, what it takes to drag a project across the finish line, and coming to finally understand an offhand comment a man made to Rob when he first saw that Europa when he was 13 years old: "A car like that, you can get SEX out of." Formerly 'Automotive Brake Systems'. 2nd Edition. Safety is very important in vehicle design and operation. A new section on electronic stability has

been added, and sections on driving physics, braking systems basics and braking systems for passenger cars and commercial vehicles have been updated. But the 160 or so automobiles on display are only a small part of the shiny chrome treasures that form the Mercedes-Benz Classic vehicle collection. Another 1,000 historical models are 'parked' in secret places outside Stuttgart - these secret places are called the 'Holy Halls'. This collection is the treasure trove of the brand. It has existed since 1923 and offers a comprehensive overview of the model history of Mercedes-Benz. Cars with special technology and equipment are stored here, as are the silver arrows of Caracciola, Lang and Fangio, the Pope's carriages, the state cars of the young Federal Republic of Germany or Mercedes models that became collectors' items due to their prominent previous owners. Some of these exhibits are well protected and waiting in special wooden boxes for their next use at exhibitions, fairs, events or classic car races. Others stand next to each other as silent witnesses of the past. Each time a model is modified, the collection is extended by the last vehicle of the discontinued series, which experts believe will be one of tomorrow's classic cars. The 'Holy Halls' are not open to the public; enquiries from editorial offices and TV teams have often been rejected. But, during the years 2016 to 2018, almost all the vehicles of the Mercedes collection were photographed. Thus, a unique photographic collection was created, the automobile history from more than ten decades; many of the previously unpublished photographs are exclusively available here in this book. In addition, Mercedes-Benz Classic agreed to open the 'Holy Halls' for an external photo team and provide information about the car models stored there. For the first time, it has been possible to produce a fascinating illustrated book with panoramic and detailed shots from the 'halls', and lively photo reports on cars that tell stories - from the first Benz motor car to the latest Formula 1 racing car. Equally thrilling are the stories of the unique specimens and prototypes that are stored in the 'Holy Halls': Mercedes models that never went into production are presented for the first time. The stories about the selected automobiles of the vehicle collection are supplemented by historical recordings from the Mercedes-Benz Classic archive. This is the story about The Old Lady; a 1958 Volvo PV 444 L - one of the last of its kind. If you helped, your name may be listed in the pages! Besides the unique narrative, chapters include information on car and part sources; initial inspection, inventory, dismantling,

restoration and reassembly processes; Internet research tips; necessary tools and equipment; FAQs, and parts cross-reference. Learn tips and tricks from over eight years of work, including a few mistakes, captured in detailed notes and nearly 90 high-resolution color images. Use this resource for inspiration and to guide you as you restore your own Volvo PV 444, 544, 455/Duet/P210, or older classic Volvo vehicle. Truly a must-have for any Volvo PV owner!
