***Robert Thorne Coryndon Jun 04 2021 Robert Thorne Coryndon, born in South Africa in 1870, served twenty-eight years as the top-ranking administrator of African dependencies, a career unmatched by any other British colonial governor. "Governors were expected, through a combination of good sense and good character, to exercise rule over dependent peoples in an honest and impartial manner—an amalgam of liberal values and autocratic methods which lent a certain ambiguity to British imperial rule in Africa and elsewhere." During his rule in Barotseland (1897-1907) under Cecil Rhodes' British South Africa Company, Coryndon confronted the problems of establishing a colonial regime; in 1914-1915, during the last seven years of his Swaziland appointment, he served as Chairman of the land commission that delineated the boundaries of African reserves in Southern Rhodesia; as governor of Uganda during a time of rapid economic expansion (1917-1922), he set up legislative and executive councils; and as governor of Kenya (1922-1925) he formed local native councils as an experiment in indigenous administration. This first full-length study of Coryndon is neither a traditional gubernatorial biography of a favoured son of the imperial school nor an ideological history of colonial oppression. Instead***

***Youé sets out to analyze Coryndon's relationships with African rulers, white settlers, Indian traders, and metropolitan officials in order to assess the impact of his administrations on the territories he governed and to delineate the constraints on proconsular rule.***

***eBook for Statistics for Business and Economics: Global Edition May 23 2020 A classic text for accuracy and statistical precision. Statistics for Business and Economics enables students to conduct serious analysis of applied problems rather than running simple "canned" applications. This text is also at a mathematically higher level than most business statistics texts and provides students with the knowledge they need to become stronger analysts for future managerial positions. The eighth edition of this book has been revised and updated to provide students with improved problem contexts for learning how statistical methods can improve their analysis and understanding of business and economics. Need extra support? This title can be supported by MyMathLab Global, an online homework and tutorial system which can be used by students for self-directed study or fully integrated into an instructor's course.
