Mind, State and Society examines the reforms in psychiatry and mental health services in Britain during 1960–2010, when de-institutionalisation and community care coincided with the increasing dominance of ideologies of social liberalism, identity politics and neoliberal economics. Featuring contributions from leading academics, policymakers, mental health clinicians, service users and carers, it offers a rich and integrated picture of mental health, covering experiences from children to older people; employment to homelessness; women to LGBTQ+; refugees to black and minority ethnic groups; and faith communities and the military. It asks important questions such as: what happened to peoples' mental health? What was it like to receive mental health services? And how was it to work in or lead clinical care? Seeking answers to questions within the broader social-political context, this book considers the implications for modern society and future policy. This title is also available as Open Access on Cambridge Core.

\*\*\*\*\* Eating disorders are potentially life-threatening psychiatric illnesses commonly accompanied by serious medical problems. They typically appear during adolescence or early adulthood, a time when young people are heading to college or interviewing for a first job. Many people recover fully from eating disorders, but others become chronically ill, and symptoms can continue into middle age and beyond. Written by leading authorities in eating disorders research and treatment, Eating Disorders: What Everyone Needs to Know® answers common questions about eating disorders, including anorexia nervosa, bulimia nervosa, and binge eating disorder, as well as a newly described condition, avoidant/restrictive food intake disorder (ARFID). Practical yet authoritative, the book defines the eating disorders, explains what we know about them based on the latest science, and describes how treatment works. Importantly, the book dispels common myths about eating disorders, such as the notion that they occur only amongst the affluent, that they affect only girls and women, or that they simply result from environmental factors such as the fashion industry and society's obsession with thinness. In reality, as the book explains, there is substantial evidence that eating disorders are brain-based illnesses that do not discriminate, and that they have been around for a very long time. Eating Disorders: What Everyone Needs to Know® is essential reading for those seeking authoritative and current information about these often misunderstood illnesses. Refinements/edits made to text 20 Apr 2016: This work is the culmination of several thousand research publications combined with Dr Vasquez's many years of clinical experience and teaching graduate/doctorate-level students and clinicians worldwide. With radiographs, photos, acronyms, illustrations, flowcharts, and detailed-yet-simplifying explanations, Dr Vasquez makes it easier than ever for clinicians to grasp important concepts in integrative care and functional medicine and then translate the basic science and molecular biology into treatment plans that can be explained and used in "the real world" of clinical practice. This second volume is written for clinicians already conversant in Ch.1) Patient assessment, laboratory interpretation, risk management, hypothyroidism, hemochromatosis, Ch.2) Wellness, Personalized Lifestyle Medicine, Ch.3) Integrative pain management using nutrition, botanicals, and manipulative medicine, Ch.4) Functional Inflammolgy Protocol: Diet, Polydysbiosis/Infections, Viral infections, Nutritional immunomodulation, Mitochondrial dysfunction, mTOR, ERS-UPR, Orthoendocrinology, Xenobiotic detoxification. Contents: updated Chapter 5 from "Inflammation Mastery, 4th Ed" 1) Hypertension...727, 2) Diabetes Mellitus...819, 3) Migraine & Headaches...863, 4) Fibromyalgia...901, 5) Allergic Inflammation...984, 6) Rheumatoid Arthritis...1019, 7) Psoriasis & Psoriatic Arthritis...1038, 8) Systemic Lupus Erythematosus...1053, 9) Scleroderma & Systemic Sclerosis...1074, 10) Vasculitic Diseases...1094, 11) Spondyloarthropathies & Reactive Arthritis...1108, 12) Sjögren Disease...1119, 13) Raynaud's Disorder...1127, 14) Clinical Notes on Behçet's Disease, Sarcoidosis, Dermatomyositis & Polymyositis...1131. The Inflammation Mastery & Functional Inflammolgy series of books and videos translates important concepts and nutritional/biomedical science into easy and practical clinical applications for the prevention and treatment of disorders of sustained inflammation, which Dr Vasquez describes as "patterns of metabolic disturbance and inflammatory dysfunction" existing in three sequential and overlapping categories: 1) metabolic inflammation, 2) allergic inflammation, 3) autoimmune inflammation. This book includes access to video presentations which introduce the origin and components of the Functional Inflammolgy Protocol and FINDSEX(r) acronym. Post-publication
