Business, Conflict Resolution and Peacebuilding Oct 26 2020 Business, Conflict Resolution and Peacebuilding examines the actions currently being taken by businesses in areas of violent conflict around the world, and explores how they can make a significant contribution to the resolution of violent conflicts through business-based peacebuilding. This book combines two approaches to provide a comprehensive look at the current state and future of business-based peacebuilding. It marries a detailed study of documented peacebuilding activities with a map of the possibilities for future business-related conflict work and pragmatic suggestions for business leaders, conflict resolution practitioners, and peacebuilding organizations. The use of the label 'business-based peacebuilding' is new and signifies actions business can take beyond simple legal compliance or making changes to avoid creating a conflict. Although business-based peacebuilding is new, examples are included from around the world to illustrate that, working together, businesses have a strong contribution to make to the creation of peaceful societies. The book advocates pragmatic peacebuilding, which is not overly concerned with cause-driven models of conflict. Instead, pragmatic peacebuilding encourages an examination of what is needed in the conflict and what can be provided. This approach is free of some of the ideological baggage of traditional peacebuilding and allows for a much wider range of participants in the peacebuilding project. This book will be of much interest to students of peace studies, conflict resolution, international security and business studies, as well as to practitioners and business leaders. Derek Sweetman is Dispute Resolution Director for Better Business Bureau in Washington, DC and Instructor at New Century College, George Mason University, USA.

Corporate Resolutions (Classic Reprint) Apr 12 2022 Excerpt from Corporate Resolutions Section 7 7 B and amendments of the Federal Bankruptcy Act, the Chandler Act, with its amendments, and the formation and functioning of the Securities and Exchange Commission have brought to the subject matter far-reaching changes and developments. Reorganization and merger of corporations have advanced with leaps and bounds

making this phase of the law of growing importance. The majority of resolution forms and many of the other forms included in this volume are tested forms taken from cases litigated in the various state and federal courts throughout the United States. Whether from the older cases or from those more recently litigated, the law governing the forms presented has never been reversed, so far as the author has been able to discover after diligent search. The forms which have not undergone litigation have been drawn by experts in the field of corporation law. The author has endeavored to belkely dis criminating in the selection, without repetition, of a wide variety of what may be called basic forms, which are representative of virtually every phase of the subject, and, as they stand, or with but slight changes, should meet nearly every requirement of corporate functioning. The mass of official state and federal forms required to be filed in various state and federal departments of government have no place in a volume of this kind, as they are too voluminous for inclusion as well as being subject to periodic change. Such forms may be obtained, respectively, from the Secretary of State in the various states and from the federal departments concerned with the particular subject matter. New Frontiers in Asia-Pacific International Arbitration and Dispute Resolution Jul 23 2020 International Arbitration Law Library Volume 59

The eastward shift in international dispute resolution has already involved initiatives not only to improve support for international commercial arbitration (ICA) and investor-state dispute settlement (ISDS) but also to develop alternatives such as international commercial courts and mediation. Focusing on these initiatives and their accompanying case law and trends in the Asia-Pacific region, this invaluable book challenges existing procedures and frameworks for cross-border dispute resolution in both commercial and treaty arbitration. Specially assembled for this project, an outstanding team of experienced and insightful arbitrators and scholars describes pertinent developments including: ICA and ISDS in the context of China's Belt and Road Initiative; the Singapore Convention on Mediation; the shift to virtual hearings and other challenges from the COVID-19 pandemic; mistrust of the application of the rule of law in certain East Asian jurisdictions; growing public concern over ISDS arbitration; tensions between confidentiality and transparency; and potential regional harmonisation of the public policy exception to arbitral enforcement. The contributors chart evolving practices and high-profile cases to make informed observations about where changes are needed, as well as educated guesses about the chances of reforms being successful and the consequences if they are not. The main jurisdictions covered are China, Hong Kong, Japan, Malaysia, India, Australia and Singapore. The first in-depth study of recent trends in dispute resolution practice related to business in the Asia-Pacific region, the book's practical analysis of new resources for dealing with the increasing competition among countries to become credible regional dispute resolution hubs will prove to be of great value to specialists in the international business law sector. Lawyers will be enabled to make informed decisions on which venue and dispute resolution methods are the most suitable for any specific dispute in the region, and policymakers will confidently assess emerging trends in international dispute resolution policy development and treaty-making.

Confidentiality Secrecy Privilege Hb Nov 26 2020 This book examines confidentiality, secrecy and privilege issues in insolvency proceedings for corporates and banks. It attempts to fill the gap that the authors have identified. Bankruptcy and insolvency legal research, in particular, seem to lack clear definitions, incomplete laws and cases with respect to the application of these three themes in corporate insolvency and bank resolution proceedings. Moreover, there are still inconsistent views and opinions of judicial authorities across different jurisdictions about these topics. The study deliberately has a focused aim by arranging a unique collection of rules and court cases, approached from different perspectives of relevant stakeholders. It provides a mapping exercise with sources and commentary aimed at practitioners and scholars of insolvency law, which will come to more light and depth in legal environments that in themselves present a legal framework. Also, this book will serve as a preliminary research for additional research projects and other publications.

helpful resources. Connected eBooks provide what you need most to be successful in your law school classes. Corporate Criminal Investigations and Prosecutions provides readers a comprehensive understanding of the process behind the investigation, prosecution, and resolution of criminal charges against organizations. Over the past two decades, corporate criminal liability has developed into one of the fastest-growing and most dynamic areas of legal practice. The growth of corporate criminal enforcement has correlated with a broad shift in how the government investigates and resolves corporate criminal violations. As a result of these developments, the practice of investigating, prosecuting, and resolving corporate criminal cases has many significant differences from other areas of criminal or civil law. Notably, one of the most significant aspects that distinguishes corporate criminal practice is that much of it occurs outside of the formal judicial system; nearly all DOJ corporate criminal matters are resolved through negotiated settlements, and very few cases involve court proceedings or go to trial. As a result, many parts of this practice remain relatively unknown to students and practitioners. Until now. With the publication of this book, authors Leo Tsao, Daniel Kahn, and Eugene Soltes, whose resumes collectively reflect the highest levels of practice and expertise in this field, open a window into all aspects of corporate criminal investigations and prosecutions. Professors and students will benefit from: The authors bring a unique perspective and unparalleled qualifications to the subject of corporate criminal liability. Daniel Kahn is the former acting Deputy Assistant Attorney General of the Criminal Division and former Chief of the Fraud Section and FCPA Unit. Leo Tsao is the former Principal Deputy Chief of the Money Laundering and Asset Recovery Section and has held supervisory positions in the Bank Integrity Unit and FCPA Unit within the DOJ's Criminal Division. Eugene Soltes is a professor at Harvard Business School, and regularly teaches and advises companies on corporate integrity, organizational cultures, and compliance systems. Comprehensive coverage: Part One addresses topics that are generally applicable to all corporate criminal cases, such as the legal principles underlying corporate criminal liability; the individual liability of corporate officers for corporate crimes; and the constitutional rights of criminal corporate defendants—to name a few. Part Two addresses specific categories of federal crimes commonly used to charge corporate defendants, such as conspiracy, the FCPA, the Bank Secrecy Act, antitrust laws, and RICO. Part Two also provides insights into criminal activity and law enforcement within the technology sector as it pertains to virtual currency (e.g., Bitcoin). Extensive online resources include discussion questions, and relevant case material for key chapters

Settling Disputes Dec 08 2021 Within the past few years, innovative methods have been developed not only to settle disputes out of court but also to supplement or replace the means by which legislatures, businesses, communities, therapists, and schools handle conflicts that once could be resolved only by litigation or force. Settling Disputes serves as an essential guide to the new settlement alternatives. This updated edition, in response to the rapid changes of the past five years, includes substantial new material that describes recent transformations in the way that courts and public agencies respond to disputes. The book discusses alternative dispute resolution from the viewpoints of potential participants and offers advice to those who are involved in disputes to help them analyze their situations and goals. Finally, it provides suggestions for professionals involved in dispute resolution and for those whose jobs in law, business, or government are affected by the new options for settling disputes. The dispute resolution movement continues to offer the most hopeful, powerful alternative to the business and personal costs of litigation or, worse, of violence. It has tremendous implications for the professional lives of Americans, for their private lives—as parents, spouses, neighbors, and consumers—and for their role as citizens. The first edition of Settling Disputes was awarded the 1990 Center for Public Resources Book Prize.

Ilocano Irrigation Mar 31 2021 This volume examines some of the major factors—social, demographic, and environmental—that account for the success of communal irrigation in Ilocos Norte and, by implication, its absence in adjacent areas, other parts of the Philippines, and, more widely, in other parts of insular Southeast Asia. However, whether this explanation accounts for all the factors involved, or even adequately weighs those that are here discussed, is secondary to the main concern of this volume: corporate groups. What *zanjeras* [irrigation societies] show are repeated examples of how individual farmers, working in concert, developed and employed corporate principles to the solution of a common goal or problem. It is a kind of “solution” that has been widely and effectively employed in much of human history.

Bank Recovery and Resolution Dec 20 2022 Bank Recovery and Resolution Second Edition Sven Schelo Since 2008, enormous efforts have been made worldwide to draft rules to prevent a reoccurrence of the devastating financial events of that year. In the process, bank business has been laid open to intense public and government scrutiny, and regulation of banking has grown to spectacular proportions. Prominent among the measures taken is the EU Bank Recovery and Resolution Directive (BRRD), which, together with the Single Resolution Mechanism (SRM) and the Single Resolution Fund, constitutes a crucial new pillar in the European Banking Union. Practitioners searching for orientation in what can readily be perceived as a ‘jungle’ have an urgent need for a clear and systematic description and analysis of these new rules, which are sure to have a massive impact on bank business from this time on, not only in Europe but also wherever European business is to be found. The solidly grounded analysis in this important book sets the new rules under BRRD into their full context as cross-border phenomena. With its crystal-clear explanation of key provisions, procedures, and ‘triggers’, the book organises a highly complex legal system into patterns and action plans that can be applied in virtually any eventuality likely to arise in cases where bank business is of central significance. Among the topics covered are the following: - entities covered by BRRD; - exceptions under BRRD; - objective and scope of BRRD tools - bail-in, bridge bank, sale of business, asset separation; - asset quality reviews; - curing or mitigating the continuing problem of non-performing loans; - new rules as response to lack of private solutions; - banks’ requirement to provide a minimum amount of eligible liabilities; - safety buffers to protect resolution; - need to be ‘resolvable’ in a worst case; - leverage and liquidity ratios; - forced mergers; - market spillover effects of recovery planning; - group recovery planning; - effects of foreign law contracts and assets; - write-down of capital instruments; and - special problems of cross-border restructuring. The presentation is enhanced by a comparative dimension, which includes reference to United States and other national developments and a full-scale analysis of Switzerland’s regulatory response to the crisis. Given that a full seamless global system of bank recovery and resolution has not yet been found, and that major banks are global players headquartered in different jurisdictions and even different continents, this book will greatly assist in the work of practitioners who must deal with cases involving international banking under the prevailing status quo. Its usefulness to officials and academics in international banking and finance law and policy, who are working towards a global solution, is of incalculable value.

Company Law in East Asia Feb 16 2020 First published in 1999, this volume provides an overview of company laws in South East Asia, North East Asia and the Pacific. The chapters adopt a standard format to allow for comparisons to be made as well as highlighting key features of company laws in each jurisdiction. The contributors are experts in their fields and present practical and policy related insights. The book also contains some useful overviews of company law themes in Asia.
