This is a must have for the pre-school classroom. It is filled with ideas for crafts, activities, books and much more for a theme based pre-school program. The key to a project's ultimate success is good planning. This unique new book shows how to prepare for the myriad of steps required to execute production and post production of a video, film or multimedia project. Cartwright explains in detail how to save money and time in production and post-production, yet produce a quality program with high production values. The craft of production planning is explained through a comprehensive system. The production steps are all there, enhanced with graphs of the production process, production forms, photos and a comprehensive list of production resources along with a chapter devoted to the use of computers for the production and post-production process. The techniques of planning for success are easily applied to both traditional linear program development to interactive multimedia development for all types of programs, including communications, training, marketing, corporate news and teleconferencing. Pre-Production Planning for Video, Film and Multimedia also includes 30 planning, production and post-production forms that can be accessed on an accompanying complimentary disk (for both IBM compatibles or Mac). Steve R. Cartwright is president of Cartwright & Associates, a training and communications company, and co-owner of the Motion Graphics Company, a computer graphics and animation firm. A leading producer, consultant and instructor, Cartwright is author of Training with Video and Secrets of Successful Video Programs. Teachers must be prepared to create an effective learning environment for both general education students and students with special needs. This can be accomplished by equipping teachers with the proper knowledge and strategies. Preparing Pre-Service Teachers for the Inclusive Classroom discusses the latest approaches, skills, and methodologies on how to support special needs students. Highlighting relevant perspectives on technology implementation, curriculum development, and instructional design, this book is an ideal reference source for pre-service teachers, teacher educators, researchers, professionals, and academics in the education field. For the past few decades a growing number of scholars have attempted to overthrow the traditional Wellhausenian view that the so-called 'Yahwist' or 'J' source of the Pentateuch is the oldest of the four major sources. These scholars have argued that J was composed during the exilic or post-exilic periods of ancient Israel. Their arguments have focused on the literary, historiographic, and theological characteristics of 'J'. This book attempts to re-evaluate on linguistic grounds such efforts to place the Yahwist source in the exilic or post-exilic periods. The study employs the methodology developed most prominently by Avi Hurvitz for identifying characteristic features of post-exilic Hebrew ('Late Biblical Hebrew'). This divides the language of the Hebrew Bible into three main chronological stages: Archaic Biblical Hebrew (ABH), Standard Biblical Hebrew (SBH), and Late Biblical Hebrew (LBH). Wright examines 40 features of J for which useful comparisons can be made to LBH and finds no evidence of LBH in the entire Yahwist source. Therefore it is unlikely that J was composed during the post-exilic period. Moreover since Hurvitz has shown that the exilic period was a time of transition between SBH and LBH such that late features began to occur in exilic texts, the author concludes on linguistic grounds that J was most likely composed during the pre-exilic period of ancient Israel. "TRB's National Cooperative Highway Research Program (NCHRP) Report 753: A Pre-Event Recovery Planning Guide for Transportation is designed to help transportation owners and operators in their efforts to plan for recovery prior to the occurrence of an event that impacts transportation systems. NCHRP Report 753 is intended to provide a single resource for understanding the principles and processes to be used for pre-event recovery planning for transportation infrastructure. In addition to the principles and processes, the guide contains checklists, decision support tools, and resources to help support pre-event recovery planning."--Publisher description. Working up the courage to take a big, important leap is hard, but Jabari is almost absolutely ready to make a giant splash. Jabari is definitely ready to jump off the diving board. He's finished his swimming lessons and passed his swim test, and he's a great jumper, so he's not scared at all. "Looks easy," says Jabari, watching the other kids take their turns. But when his dad squeezes his hand, Jabari squeezes back. He needs to figure out what kind of special jump to do anyway, and he should probably do some stretches before climbing up onto the diving board. In a

sweetly appealing tale of overcoming your fears, newcomer Gaia Cornwall captures a moment between a patient and encouraging father and a determined little boy you can't help but root for. Despite advancements in and availability of corpus software in language classrooms facilitating data-driven learning (DDL), the use of such methods with pre-tertiary learners remains rare. This book specifically explores the affordances of DDL for younger learners, testing its viability with teachers and students at the primary and secondary years of schooling. It features eminent and up-and-coming researchers from Europe, Asia, and Australasia who seek to address best practice in implementing DDL with younger learners, while providing a wealth of empirical findings and practical DDL activities ready for use in the pre-tertiary classroom. Divided into three parts, the volume's first section focuses on overcoming emerging challenges for DDL with younger learners, including where and how DDL can be integrated into pre-tertiary curricula, as well as potential barriers to this integration. It then considers new, cutting-edge innovations in corpora and corpus software for use with younger learners in the second section, before reporting on actual DDL studies performed with younger learners (and/or their teachers) at the primary and secondary levels of education. This book will appeal to post-graduate students, academics and researchers with interests in corpus linguistics, second language acquisition, primary and secondary literacy education, and language and educational technologies. First published in 1986, this book has been enormously influential in the training and professional development of early years workers. Pre-school education is the starting point of learning whereby the children are in the most critical and formative years. The early years of education lay the foundation for later development. With tremendous improvement in the modern technology, pre-school education must also keep abreast with this high technology. Therefore, introducing computers to children at this foundation level is most appropriate and timely. This paper aims to bring about the awareness of teachers and parents on the important applications of courseware at this level. VocabPro is an easy-to-use courseware which will assist teachers to prepare interesting lessons and teach pre-schoolers English vocabulary. The various features found in VocabPro are focused in this paper. A brief discussion on the development to VocabPro using software engineering principles, techniques and tools is also included. This volume deals with the tension between unity and diversification which has gained a central place in the debate under the label of 'fragmentation'. It explores the meaning, articulation and risks of this phenomenon in a specific area: International Criminal Justice. It brings together established and fresh voices who analyse different sites and contestations of this concept, as well as its context and specific manifestations in the interpretation and application of International Criminal Law. The volume thereby connects discourse on 'fragmentation' with broader inquiry on the merits and discontents of legal pluralism in 'Public International Law'. Dr. Paul Karleen offers an insightful evaluation of the pre-wrath view of the Rapture, challenging such pre-wrath assertions as these: The church will be taken after the middle of Daniel's 70th week; There is no biblical evidence for the imminent return of Christ; The Day of the Lord does not include the Millennium; The Tribulation is shortened to less than 3 1/2 years; The archangel Michael is the restrainer of 2 Thessalonians chapter 2; Jesus Christ returns to earth only once in a combined Rapture and Second Advent in a coming that begins before the end of the 70th week and finishes after it. The Pre-Wrath Rapture of the Church: Is it Biblical? weighs pre-wrath arguments, not from the standpoint of any particular Rapture position, but with regard to facts, contexts, language, and logic. - Back cover. Audrey Curtis lays down a curriculum framework for three to five-year old children, stressing the need for the pre-school curriculum to be based upon the experiences children bring from their homes and communities. She also explores the influence of early educators on modern pre-school education and looks at the question of assessment and curriculum continuity. "This Handbook is the outgrowth of the author's empirical research into the struggles encountered by first-year law students as they begin their legal writing classes." -- page ix. In this monumental work, Professor Price offers an inclusive New Testament canon with twenty-seven additional sacred books from the first three centuries of Christianity, including a few of the Dead Sea Scrolls and Nag Hammadi writings. Price also reconstructs the Gospel of Marcion and the lost Gospel according to the Hebrews. Here, for the first time, is a canon representing all major factions of the early church. As an interpretive translation, Price's text is both accurate and readable and is tied more closely to the Greek than most previous translations. Price conveys the meanings of words in context, carefully choosing the right phrase or idiom to convey their sense in English. For words that had a specific theological import when first written, Price leaves the Greek transliteration, giving readers archons for the fallen angels thought to be ruling the world, paraclete for encourager, and pleroma for the Gnostic godhead. Within the collection, each book is introduced with comments about the cultural setting, information about when a document was probably written, and significant textual considerations, which together form a running commentary that continues into the footnotes. The findings of scholars, documented and summarized by Price, will come as a surprise to some readers. It appears, as Price suggests, that most of what is known about Jesus came by way of revelation to Christian oracles rather than by word of mouth as historical memory. In addition, the major characters in the New Testament, including Peter, Stephen, and Paul, appear to be composites of several historical individuals each, their stories comprising a mix of events, legend, and plot themes borrowed from the Old Testament and Greek literature. In the New Testament world,

theology developed gradually along different trajectories, with tension between the charismatic ascetics such as Marcion and Thecla, as examples, and the emerging Catholic orthodoxy of such clergy as Ignatius and Polycarp. The tension is detectable in the texts themselves, many of which represent "heretical" points of view: Gnostic, Jewish-Christian, Marcionite, and proto-orthodox, and were later edited, sometimes clumsily, in an attempt to harmonize all into one consistent theology. What may occur to many readers, among the more striking aspects of the narratives, is that the earliest, most basic writings, such as Mark's Gospel in inarticulate Greek, are ultimately more impressive and inspirational than the later attempts by more educated Christians to appeal to sophisticated readers with better grammar and more allusions to classical mythology and apologetic embellishments. The critical insights and theories on display in these pages have seldom been incorporated into mainstream conservative Bible translations, and in many ways, Price has made the New Testament a whole new book for readers, allowing them, by virtue of the translation, to comprehend the meaning of the text where it is obscured by the traditional wording. Whatever usefulness teachers, students, and clergy may find here in terms of pedagogical and inspirational value, The Pre-Nicene New Testament is guaranteed to provoke further thought and conversation among the general public-- hopefully toward the goal of more personal study and insights.
