Quality Services in Academic Libraries Oct 22 2022 There is great consistency throughout these articles, research projects, management

schemes, and standards, in and out of librarianship. Does the repetition suggest that the lessons have not yet been learned? Rather, it may be that there is no new silver bullet or shortcut for academic libraries. Experience reveals that one may have the formal process without getting good results and vice versa; the determining factor is whether the library staff, managers, and stakeholders define certain fundamental assumptions about the nature of the enterprise. All the above have in common the following underlying components: The careful definition of goals or of some kind of criteria against which success can be assessed

A focus on meeting the needs of the users, as defined by the library and the institution Leadership: a commitment from the top, conscious efforts at ensuring communication, the provision of training and resources for the process of evaluation, the active support of a process to promote shared values The involvement of all levels of staff in goal setting, evaluation, and the improvement of processes and services Integrating a process of evaluation that is continuous and adaptive, whether that process is based on the framework of TQM, strategic planning, or another model **Geomagnetic Research in Physics** Dec 12 2021

**WAEC in Review** Dec 24 2022  
WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable stride towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every

Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army-Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence

level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the “Turning the Tide” project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

## **Physics, Chemistry and Application of**

**Nanostructures** Jun 06 2021

This proceedings volume presents invited reviews and original short notes of recent results obtained in studies concerning the fabrication and application of nanostructures, which hold great promise for the new generation of electronic and optoelectronic devices. Governing exciting and relatively new topics such as fast-progressing nanoelectronics and optoelectronics, molecular electronics and spintronics, as well as nanotechnology and quantum processing of information, this book gives readers a more complete

understanding of the practical uses of nanotechnology and nanostructures.

*Pathway to a Happy and Successful Life* Feb 02 2021 Life is full of many colors and we don't have the ability to choose the colors but we do have the absolute powers to choose the light in which to see the colors which of cause

changes the actual colors to the ones we desire depending on the choice of color mix of light we adopt which are in our attitudes, perceptions, and thought choices. In *Pathway to a Happy and Successful Life*, Christian O. O. Okwori simplifies in the most precise and concise terms the workability of a sweet life on earth for everyone despite the vicissitudes of life and the adversities that come a person's ways in the course of existence both natural and manmade, within and beyond human control, and chance phenomena. This book is a practical help to living the quality life that you most desire and consciously design for

yourself in making the world a haven and meaningful place for all. You will in the course of reading this life changing piece, acquire the extraordinary ability and rare understanding of enjoying life, making the best of everything, turning your home to heaven, living beyond problems and difficulties, how to love and be loved by fellow men, building and keeping wonderful relationships for life, and most importantly, experiencing true success and life in consistent happiness. A life of boundless happiness is possible for you! A life of understanding and living in your utopia is possible! A worry-free life is practicable and costs nothing! This and

many more golden secrets to the mastery of life in simplistic principles both preceptual and heuristic have been exposed by Chris in this book so you can finally free yourself and loved ones from the cages of pains, worries, torment of diseases, emotional troubles, failures, and fears so as to be ushered in to a whole new vista of life in all its pristine beauties and goodness simply by learning the tri-balance of living with yourself, fellow man, and Almighty God.

**My Years in the Early Peace Corps** Feb 14 2022 In this book Sonja Krause Goodwin recounts her experience joining the Peace Corps in 1964 and describes the training she underwent to teach in Nigeria at Columbia Teachers College in New York City. Goodwin tells readers about her service as a University teacher in physics while also serving as head of the Physics Department at Lagos University in Nigeria. She also describes her vacation travels during that time, mostly in Nigeria— including an attempt to climb Mt. Cameroon. She writes about her interactions with her

students, her fellow University teachers and other University employees, her fellow Peace Corps volunteers and other expatriates, and Nigerians whom she met under during her travels. Goodwin also delves into the politically motivated “university crisis” that led to the exodus from the university and Nigeria of almost all the expatriate teaching staff of the university including the Peace Corps volunteers. She also discusses some of her work for the West African Examinations Council and the Aptitude Testing Unit in Lagos while waiting to be sent to another assignment for her second year in the Peace Corps.

**Algebra, Geometry and  
Mathematical Physics** Mar  
03 2021 This book collects the  
proceedings of the Algebra,  
Geometry and Mathematical  
Physics Conference, held at the  
University of Haute Alsace,  
France, October 2011.

Organized in the four areas of  
algebra, geometry, dynamical  
symmetries and conservation  
laws and mathematical physics  
and applications, the book  
covers deformation theory and  
quantization; Hom-algebras

and n-ary algebraic structures;  
Hopf algebra, integrable  
systems and related math  
structures; jet theory and Weil  
bundles; Lie theory and  
applications; non-commutative  
and Lie algebra and more. The  
papers explore the interplay  
between research in  
contemporary mathematics and  
physics concerned with  
generalizations of the main  
structures of Lie theory aimed  
at quantization and discrete  
and non-commutative  
extensions of differential  
calculus and geometry, non-  
associative structures, actions  
of groups and semi-groups,  
non-commutative dynamics,  
non-commutative geometry and  
applications in physics and

beyond. The book benefits a  
broad audience of researchers  
and advanced students.

**From Excellence to  
Distinction** Apr 16 2022 This  
book is a collection of  
presentations made during the  
tenure of Professor Oyewusi  
Ibidapo-Ope as Vice Chancellor  
(2000-2007) at the University  
of Lagos. Included are  
Matriculation and  
Convocations speeches  
delivered by Professor Oyewusi  
Ibidapo-Ope himself as well as  
Inaugural Lectures delivered  
by various faculty members  
and guests on a wide range of  
topics from Biochemistry,  
Botany, Physiotherapy,  
Development, Medicine. A brief  
chapter takes stock of the

current state of the University generally while other chapters detail some of the government lobbying carried out by the Vice-Chancellor and his team. A chapter entitled "Town and Gown" record Professor Ibidapo-Ope's addresses to various organisations in Lagos while another records speeches at workshops and seminars such as the Nigerian Sociological Society.

**School Science Practical**

**Work in Africa** Sep 21 2022  
School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry-based learning, which

signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.

Physics for Senior Secondary

Schools Nov 30 2020 This text on physics has been written for students in the senior secondary classes within the Ghanaian education system. It is specially designed to provide guidance for school and private students leading to the West African Examinations Council

(WAEC) Senior Secondary schools as well as the GCE examinations. The book is essentially designed to meet the requirements of the senior secondary school syllabus in physics. Part One is for the use of students during the first senior secondary school physics course; Part Two and Three cover year two and year three respectively.

*Introduction to Motion* Nov 23 2022 Motion is a core aspect of Physics; ideas from it are used in almost all other aspects of Physics. In this book, we present the subject in very clear and fascinating manner. Our aim is to make students and readers grasp the core concepts without the usual

boredom associated with most scientific textbooks. Motion parameters like distance/displacement, speed/velocity, and acceleration were nicely explained. The book contains an excellent treatment of displacement-time and velocity-time graphs. Equations of motion were extensively presented and wrapped-up with motions under gravity. You will want to see other subjects in sciences treated this way when you finish reading it.

**Handbook of Research on the Role of Human Factors**

## **in IT Project Management**

May 17 2022 The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of

human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

## **Physics of Highly Charged**

**Ions** Aug 08 2021 The physics of highly charged ions has become an essential ingredient of many modern research fields, such as x-ray astronomy

and astrophysics, controlled thermonuclear fusion, heavy ion nuclear physics, charged particle accelerator physics, beam-foil spectroscopy, creation of xuv and x-ray lasers, etc. A broad spectrum of phenomena in high-temperature laboratory and astrophysical plasmas, as well as many aspects of their global physical state and behaviour, are directly influenced, and often fully determined, by the structure and collision properties of multiply charged ions. The growth of interest in the physics of highly charged ions, experienced especially in the last ten to fifteen years, has stimulated a dramatic increase in research activity in this field

and resulted in numerous significant achievements of both fundamental and practical importance. This book is devoted to the basic aspects of the physics of highly charged ions. Its principal aim is to provide a basis for understanding the structure and spectra of these ions, as well as their interactions with other atomic particles (electrons, ions, atoms and molecules). Particular attention is paid to the presentation of theoretical methods for the description of different radiative and collision phenomena involving multiply charged ions. The experimental material is included only to illustrate the validity of

theoretical methods or to demonstrate those physical phenomena for which adequate theoretical descriptions are still absent. The general principles of atomic spectroscopy are included to the extent to which they are pertinent to the subject matter.
