Proceedings of the 2022 5th International Conference on Humanities Education and Social Sciences (ICHESS 2022) Jun 05 2021 This is an open access book. ICHESS started in 2018, the last four sessions of ICHESS have all been successfully published. ICHESS is to bring together innovative academics and industrial experts in the field of Humanities Education and Social Sciences to a common forum. And we achieved the primary goal which is to promote research and developmental activities in Humanities Education and Social Sciences, and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. 2022 5th International Conference on Humanities Education and Social Sciences (ICHESS 2022) was held on October 14-16, 2022 in Chongqing, China. ICHESS 2022 is to bring together innovative academics and industrial experts in the field of Humanities Education and Social Sciences to a common forum. The primary goal of the conference is to promote research and developmental activities in Humanities Education and Social Sciences and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in Humanities Education and Social Sciences and related areas.

Conquering Your Engineering Internship Apr 15 2022 Why struggle over the rough paths of your engineering career when you can take a shortcut and enjoy the ride? Make money, have an adventure, and get real-world experience. Conquering Your Engineering Internship is the only guide to internships and co-ops that students in technical fields need. Learn How To: Steal an Internship or Co-op using unconventional techniques. Ace interviews even if you don't know all the answers. Avoid some common (and some uncommon) mistakes that interns make. Expand your horizons and have fun with the opportunities internships create. Out-shine your full-time coworkers with skills from outside the College of Engineering. Keep your internship experiences and contacts working for you even after you've left. Solve common roadblocks you'll face as an intern. Make the most of your intern salary.

Intern Experience at MEL, Inc Oct 09 2021 ...The author spent a one-year internship at MEL, Inc., a civil and mechanical engineering consulting firm located in Baton Rouge, Louisiana. By special arrangement with the president of the firm, the author was able to participate in roles at various levels within the firm. These activities included engineering design, supervision and management, project cost control, and interface with top level management. During this period, the author has been engaged in the following assignments: 1. Serving as senior project engineer on the Louisiana Training Institution air conditioning and heating project, 2. Serving at the review and advisory level for three projects, 3. Studying and implementing computer aided design and drafting system for MEL, Inc. 4. Developing a project cost control system that is interactive with the firm's payroll program. 5. Upgrading the firm's computer capacity. 6. Performing special assignments from the President, Executive Vice-President, Manager of Operation and Manager of Business and Fiscal Affairs at MEL, Inc. These activities involved the application of scientific principles to the design, installation, and improvement of integrated systems of people, materials, and equipment to provide the most effective operating and work procedures. As a result of this

involvement in a wide range of assignments, the author now has a broadly based experience in a consulting engineering firm as both engineer and manager. The author also found that well-developed, practical courses in communication, business, engineering, law, and management from the Doctor of Engineering program at Texas A & M University contributed greatly to this successful internship with MEL, Incorporated.

Earth's Changing Climate Engineering Internship Jan 24 2023 "Students act as civil engineering interns to design a plan to modify a city's roofs in order to reduce the city's impact on climate change. These plans must meet three design criteria: 1) reducing impact on the climate; 2) preserving the city's historic character; and 3) minimizing costs. Students focus on the practice of isolating variables in planning and conducting tests to deepen their understanding of climate change. They also learn about the cause-and-effect mechanisms involved as changes to albedo and combustion of fossil fuels affect climate." --taken from publisher's website.

The Academic Hustle Nov 10 2021 A guide to financial aid and paying for school "filled with nuggets of insight and wit from one who succeeded against the odds and aims to inspire others" (Dr. Robert M. Franklin, President Emeritus, Morehouse College). Matthew Pigatt made the transformation from a juvenile delinquent with a 2.1 GPA in high school to a national award-winning researcher, graduating magna cum laude from Morehouse. In this book, Matthew uses his journey of entering college on academic probation and covering all tuition with loans—to securing over \$100,000 in scholarships, fellowships, and awards—as a springboard for a detailed, step-by-step guide to academic and career achievement. The Academic Hustle gives a personal accounting of strategies uncovered while conducting research on high achievers. Through experience and research, Pigatt has refined a system that has been replicated by hundreds of other students to secure scholarships, grants, internships, and jobs—amounting to millions in funding for their career development. Learn how to: Develop a plan for your career Find and apply for scholarships Win awards and be recognized Cultivate a network for success Master time and manage money Develop an impressive résumé

The Right Hand to Eat Jan 20 2020 "A career can be like a snake and ladder journey, full of ups and downs, but remember, your career is a journey, not a destination." Your career does not start and end when you get a job. You start your career when you begin doing activities at school, playing sports on weekends, or working at your part-time or volunteer job. There are skills that you can develop and steps you can take each time you are faced with your next career transition. Your career will be a rich and rewarding experience that will require you to make many critical decisions throughout your life. So why won't you just leave school and go straight into a job that you'll have for life? Lots of reasons! You might find out you don't suit a job, you might want to earn more money, you may be offered the chance to do something more challenging, or your passion is something else. That's when you need to work through your career decision-making process and review the career you think is the best for you. The Right Hand to Eat helps you choose your career—it doesn't choose you!

Intern Experience with Turner Collie and Braden Inc. An Internship Report Aug 19 2022 This report documents my intern experience with Turner Collie & Braden Inc. during the period from August 25, 1978 until May 25, 1979. The purpose of this paper is to demonstrate that my efforts with Turner Collie & Braden Inc. satisfied the internship requirement of the Doctor of Engineering program at Texas A & M University. Objectives established for the internship included: Development of expertise in the planning for airport facilities. I prepared an airport Master Plan for northwestern Harris County, Texas. Expansion of environmental engineering experience into the area of environmental planning to include preparation of an environmental study. To accomplish this objective, I contributed to the completion of the Master Plan for Sanitary Sewerage for the Northside Service Area of Houston, Texas.

Undergraduate Research Internships to Support Exploratory Research in Transportation Engineering May 16 2022 The Case Western Reserve University Department of Civil Engineering is in the process of expanding its teaching and research activities, Transportation Engineering as part of its initiative in the overall area of Infrastructure Performance and Reliability. Although the Department has traditional strengths in the areas of transportation materials and structures, it is not well known for Transportation Engineering. Because of this, the Department plans to refine its recruiting strategies to make more engineering students aware of the opportunities available at Case Western Reserve University. The goal of this 2008 OTC project was to use this funding opportunity as seed money to recruit students into transportation engineering research and to explore research activities that can become more substantial projects in subsequent years. Research initiatives will be conducted to examine transportation-related problems. The Research Internships in Transportation (RIT) program was modeled after the National Science Foundation Research Experience for Undergraduates (REU) program, which has been used successfully to recruit students into the Department's programs in Environmental and Geotechnical engineering. Ultimately, the RIT program will lead to an increase in the number of engineers pursuing advanced degrees in Transportation Engineering in the State of Ohio, and to a series of research proposals designed to help CWRU partner with other Ohio universities and professional organizations to conduct innovative transportation research.

Top STEM Careers in Engineering Dec 19 2019 Engineers blend logic and precision with imagination, and science and math principles with vision and foresight, to create solutions for some of society's most pressing problems. From information technology to medicine, public transportation to space travel, engineers work to make innovation a reality. This inspiring book explores a variety of branches of engineering, discussing the opportunities available, typical work environments, and educational credentials needed to enter each field. Readers learn ways to enhance their background by participating in engineering organizations, science clubs, internships, research projects, and community service. Amazing full-color photos of real-life projects illustrate engineering processes in action.

Internship & Volunteer Opportunities for People Who Love to Build Things Feb 25 2023 Internships and volunteer positions offer young people a unique opportunity not only to test their interest in, and aptitude for, certain career paths but to also begin the process of career building in their desired fields. In a time of economic hardship and a tight job market, having the kind of hands-on experience provided by internships and volunteer work can be the decisive factor in an employer's decision to hire one candidate among many other applicants. This book surveys all of the many internship and volunteer opportunities available for those who like to build things—including shipbuilding and instrument-making to cabinetry and furniture-making, to civil engineering and architecture. In addition to discussing how to land, keep, and leverage an internship or volunteer position, the book also details the educational and training paths that should be pursued to optimize chances of success in the various professional fields.

Engineering in a Mountain Resort Town Apr 03 2021 This Record of Study (ROS) summarizes the experiences and lessons learned while serving as an intern with Peak Land Consultants (PLC) in Vail, Colorado. The objectives of the internship were designed to provide benefits to myself, the United States Air Force Academy, and PLC. The first objective was to develop a business plan for a similar company in a mountain community. This provides a useful tool to begin a second career after retirement from the Air Force. The second objective was to build lesson plans based on the experience at PLC for the Air Force Academy cadets. Through the use of real engineering examples and by integrating civil engineering subjects across the curriculum, Air Force Academy cadets will be better prepared for their professional life as a civil engineer. The last objective was to provide PLC with an objective management review. The management review highlighted good practices and provided recommendations for further improvement in areas such as marketing, communication, project management, training, and company goals. Each one of the objectives was tested. The business plan was provided to a loan officer at Wells Fargo bank. The loan officer remarked that the plan was well researched. He also indicated that the bank was willing to provide a loan for the business. This positive result indicated that the objective to develop a business plan for a similar company in a mountain community was met. The second objective to build lesson plans for the Air Force Academy was also met. These plans were presented to a senior class in April 07. The cadets liked the idea of seeing how an engineer solves problems in the private sector. In addition, the cadets recognized the usefulness of AutoCAD in solving problems in their other classes. Finally, the objective for providing a management review of PLC also proved to be successful. PLC has already implemented a number of recommendations from the review and is using the review to build new company and employee goals.

Intern Programs as a Human Resources Management Tool for the Department of Defense Mar 22 2020 The Department of Defense now faces the challenge of responding to the imminent retirement

of a large proportion of its civilian workers and the impending U.S. military transformation that will likely require a larger civilian workforce to support a new force structure. One way in which DoD plans to address this challenge is through recruiting "the best talent available." In its efforts to determine effective ways to recruit such workers, DoD asked the RAND Corporation to look at intern programs, characterizing DoD's current intern programs, identifying best practices for intern programs among private-sector firms and other government agencies, and recommending approaches for improving such programs. This monograph describes RAND's response, presenting and synthesizing insights and findings from interviews the authors conducted with managers of DoD and corporate intern programs, from a review of literature on intern programs, and from analyses of personnel data, and making specific DoD policy recommendations.

The Best 109 Internships Dec 23 2022 How can an internship launch your career? What do Oprah Winfrey, Katie Couric, and Bill Clinton have in common? They all had internships: Winfrey began her career interning at WTVF in Nashville, Couric got on the road to fame interning at a Washington radio station, and Clinton wet his political feet interning for Senator J. William Fulbright. Is there an internship that's perfect for you? Yes, there is. An internship can put you on the path to success, point you in a new career direction, help you discover your talents, and give you great experience. A successful internship can also help ensure gainful employment after you finish high school, college, or grad school. What advantage does The Best 109 Internships give you? The competition for good internships is fierce, but this book gives you a competitive edge. The Best 109 Internships puts you on the inside track for the best opportunities in law, the environment, advertising, sports, computers, journalism, music, health care, publishing, finance, education, television—even beer production—and more. The best information on the best internships! Entries include: §In-depth, candid critiques of the internship and its daily responsibilities §Feedback from actual interns §Advice on how to land the internship of your choice §Crucial information on important deadlines and the materials required to complete an excellent application §And, of course, our patented Busywork Meter, which tells you the truth about how much mind-numbing, menial labor will be expected of you If you want a great internship, you need this book.
