Service, repair and maintenance manual for 2 cylinder motorcycle owners. Social Europe is a key topic in the construction of the EU and its institutions. This volume examines the current state of, and perspectives for, Social Europe, as well as key issues in European social policy, including the posting of workers, the impact of the free market and regulations on social convergence, work automation, digitalisation, taxation and democracy in the workplace. The aim of this volume is to identify a course to be followed in integrating the EU's social policies and point to areas in which co-operation between member states is likely to produce best results. While a Social Europe was previously seen to be a natural consequence of political and economic integration, it is now viewed as a separate area that requires active policies to preserve the European project. The EU's big question today concerns the level at which this policy should be pursued: the volume's contributors outline difficulties with harmonising social policies across the Union, but they nevertheless argue that, owing to the common challenges faced by Europe, the idea of a Social Europe must not be abandoned and requires specific action. The volume consists of 11 chapters written by a variety of expert authors, analysing the idea of a Social Europe and proposing ways in which it could be put into practice. Social policy can no longer be seen as derived from economic policy but rather as a separate driver of development that could be of interest to the northern, southern and eastern states of the EU. More than a memoir of a custom cafe racer build this book is a tribute to a teacher who inspired young people to be creative with their minds and capable with their hands. Growing up in Fargo, North Dakota in the 1970s and 80s, The Urban Monk had the opportunity to develop a love for machines, metal working and motorcycles. This book provides a glimpse into what life was like for the author and his young friends in Fargo during that time. It is also a poignant defense of industrial arts education in public schools. After an over three year effort building a custom cafe racer in his spare time and documenting the entire process in videos shared with the world on his YouTube channel Urban Monk TV, the author tells the story of how this project became more than a custom motorcycle build - it became a tribute to his middle school Metal Shop teacher who inspired him to go on to a life time of peaceful meditation in his garage with a wrench in his hand. Anyone interested in motorcycles, mechanics, do-it-yourself projects or a historical retrospective of life in 70s-80s Fargo will enjoy this pleasant read.
