Neuropsychological Assessment of Neuropsychiatric Disorders Mar 03 2021 A 1996 survey of the members of the American Board of Professional Psychology Diplomates, published by The Clinical Neuropsychologist journal, selected the first edition of this book as one of the "Essential Books and Journals in North American Clinical Neuropsychology"--a list which included only 10 other titles! The Second Edition has improved further on this high standard. While the authors have retained the same general structure--with the addition of a set of three chapters on psychosocial outcomes--virtually the entire book has been rewritten and thoroughly updated to reflect recent developments in this area of knowledge. Part I features new chapters on the Iowa-Benton approach, on cognitive screening methods, and on computers and memory. Part II has been expanded with new chapters on Tourette's syndrome, acute and chronic hypoxemia, HIV infection, schizophrenia, Huntington's disease, and an expanded chapter on Parkinson's disease. Part III is entirely new, and it focuses on life quality outcome in head injury and pulmonary disease. Considerably enlarged in size, this book will remain the basic reference on the neuropsychological aspects of diseases affecting brain and behavior. MGB - The superlative MG Dec 12 2021 The MGB was a great British success story, a product largely conceived, designed and produced by a small team of dedicated people who genuinely cared about their work. Of course, the MGB came from a proud, successful sports car tradition, and the model it replaced - the revolutionary aerodynamic MGA - had been an unprecedented success - so the new car had big shoes to fill. Launching in 1962 and in production for eighteen years, the MGB became one of the most successful sports cars the world has ever known. This book describes how the MGB arose principally from the ideas of one man, MG's Chief Engineer, Syd Enever, how it was designed and developed, how it survived and thrived, and how it became the classic car still highly regarded today. There have been many previous books about the MGB, and the related MGC and V8 variants, but *MGB - The superlative MG* reaches a new level of detail together seasoned with fresh insight. David Knowles has been researching and writing about the MGB for more than thirty years. Prepare to be surprised at some of the stories you will have never read before, and new twists on some you possibly thought you knew well.

Nothin' but Muscle May 25 2020 The *Street Fighters* True muscle cars make no apologies. They had one primary job: get the driver from Point A to Point B as fast as law, and the driver's driving ability, would allow. They started off in the early 1960s as mid-size sedans and coupes stuffed with oversized engines - Bel Airs, Catalinas, and Tempests - and it wasn't long before crazy hi-po machines came in all shapes in sizes. Mustangs, Camaros, Chargers, Chevelles, 4-4-2s, Gran Sports ... they all had one thing in common: big engines, and big performance. In *Nothin' But Muscle*, you'll find 199 of the greatest American performance cars ever built. From the earliest 1964 GTO, to the Shelby-built muscle/racers of the late-â€~60s, to the ferocious Buicks of the 1980s and 500-plus-hp Viper and Corvette rocketships of today. *Nothin' But Muscle* brings you the most memorable and beloved pavement eaters ever seen on American soil.

Porsche 928, 924, 944 and 968 Aug 08 2021 Porsche AG, today the most profitable car company in the world, was in 1975 a small but headstrong German automaker on the verge of its most significant development. New national laws were changing the way manufacturers designed their products, but the auto consumer was also craving more exciting and innovative design. That innovation came in 1975 with the release of the revolutionary Porsche 924. This book begins its analysis with the creation of the Porsche 924 and the impact it made on the automotive world. During the 1980s, Porsche honed earlier 924 designs to create the 944 and its Turbo and convertible variants, and later the 968, completing a line that has produced some of the most respected sports cars of the modern era. The text also follows in detail the long production life and development of Porsche's V-8 powered high performance grand tourer, the 928—introduced in 1977, named the 1978 European Car of the Year and culminating in the 350 bhp 928 GTS of the 1990s. This history of the dynamic Porsche family gives a full account of each model and reveals the unique contributions each has made to a constantly evolving automotive world.
