### **Intersectionality in Action**

Oct 14 2019 Colleges and  
universities silo diversity and  
inclusion by creating specific  
courses to address them, or  
programs to welcome and  
support people with a range of  
identities, whereas in reality  
students, faculty and staff do  
not encounter diversity in the  
fractured ways that match the  
organizational structures of our  
institutions. We all  
simultaneously embody a  
variety of identities with  
different saliency in different  
circumstances and times. This  
book offers models for  
institutions to move  
intentionally toward  
intersections - of study abroad  
and multiculturalism, of race  
and gender and religion, and of  
other essential aspects of our

educational programs and our  
students' identities - to open  
doors to new possibilities that  
better prepare our students for  
life in a diverse world, and that  
allow our institutions to  
become more efficient and  
effective as we strive to not  
simply do things better in our  
own separate spheres, but to  
do better things by working  
together across difference.  
Each chapter offers action-  
oriented analysis focusing on  
particular campus  
intersections, rather than  
attending to specific  
demographic groups. Chapter  
authors also build on their own  
local expertise of doing this  
work on campuses that often  
do not have deep pockets or  
rich histories of such efforts.  
The book is organized into  
three sections: \* People focuses  
on diversity broadly defined,  
considering questions about  
how we recruit and engage the  
students, faculty, and staff in  
the campus community, and  
how we work with governing  
boards and others to promote  
inclusive excellence. \*  
Environment focuses on

inclusion, including residence life, the local community, the working and learning environment, and external factors and events such as national and international news or town gown relationships. \* Learning focuses on perspective taking and learning about difference in the core curriculum, the disciplines, and the co-curriculum, as well as professional development for faculty and staff. This groundbreaking book helps readers, no matter what position they occupy on campus, to develop the knowledge and capacities necessary to create inclusive classrooms and is premised on the understanding that identity, oppression, power and marginalization cannot be addressed by looking solely at single identities.

**Urban Agriculture and Food Systems: Breakthroughs in Research and Practice** Feb 27 2021 In recent years, the global economy has struggled to meet the nutritional needs of

a growing populace. In an effort to circumvent a deepening food crisis, it is pertinent to develop new sustainability strategies and practices to provide a stable supply of food resources. *Urban Agriculture and Food Systems: Breakthroughs in Research and Practice* is an authoritative resource on the latest technological developments in urban agriculture and its ability to supplement current food systems. The content within this publication represents the work of topics such as sustainable production in urban spaces, farming practices, and urban distribution methods. This publication is an ideal reference source for students, professionals, policymakers, researchers, and practitioners interested in recent developments in the areas of agriculture in urban spaces. *Iraq in the Twenty-First Century* Jun 21 2020 Much has been written about the events surrounding the 2003 Anglo-American invasion of Iraq and

its aftermath, especially about the intentions, principles, plans and course of action of US policy, but much less attention has been given to the consequences of US policy on Iraqi political and social development. This book provides an in-depth analysis of the impact of US policy on the social and political development of Iraq in the twenty-first century. It shows how not just the institutions of the state were destroyed in 2003, leaving the way open for sectarianism, but also the country's cultural integrity, political coherence, and national-oriented economy. It outlines how Iraq has been economically impoverished, assessing the appalling situation which ordinary people, including women and children, have endured, not just as a result of the 2003 war, but also as a consequence of the 1991 war and the sanctions imposed in the following years. The book argues that the social, political, and cultural ruin that accompanied the Iraq war was an absolute

catastrophe; that the policies which had such adverse effects were the foreseeable consequences of deliberate policy choices; and that those responsible continue to evade being made accountable.

### **Cyber Warfare and Terrorism: Concepts, Methodologies, Tools, and Applications** Nov 26 2020

Through the rise of big data and the internet of things, terrorist organizations have been freed from geographic and logistical confines and now have more power than ever before to strike the average citizen directly at home. This, coupled with the inherently asymmetrical nature of cyberwarfare, which grants great advantage to the attacker, has created an unprecedented national security risk that both governments and their citizens are woefully ill-prepared to face. Examining cyber warfare and terrorism through a critical and academic perspective can lead to a better understanding of its foundations and implications. Cyber Warfare

and Terrorism: Concepts, Methodologies, Tools, and Applications is an essential reference for the latest research on the utilization of online tools by terrorist organizations to communicate with and recruit potential extremists and examines effective countermeasures employed by law enforcement agencies to defend against such threats. Highlighting a range of topics such as cyber threats, digital intelligence, and counterterrorism, this multi-volume book is ideally designed for law enforcement, government officials, lawmakers, security analysts, IT specialists, software developers, intelligence and security practitioners, students, educators, and researchers.

### **Canadian Perspectives on Immigration in Small Cities**

Mar 31 2021 This book examines immigration to small cities throughout Canada. It explores the distinct challenges brought about by the influx of people to urban communities which typically have less than 100,000 residents. The essays are organized into four main sections: partnerships, resources, and capacities; identities, belonging, and social networks; health, politics, and diversity, and Francophone minority communities. Taken

together, they provide a comprehensive, multi-disciplinary perspective on the contemporary realities of immigration to small urban locations. Readers will discover how different groups of migrants, immigrants, and Francophone minorities confront systemic discrimination; how settlement agencies and organizations develop unique strategies for negotiating limited resources and embracing opportunities brought about by changing demographics; and how small cities work hard to develop inclusive communities and respond to social exclusions. In addition, each essay includes a case study that highlights the topic under discussion in a particular city or region, from Brandon, Manitoba to the Thompson-Nicola Region in British Columbia, from Peterborough, Ontario to the Niagara Region. As a complement to metropolitan-based works on immigration in Canada, this collection offers an important dimension in migration studies that will be

of interest to academics, researchers, as well as policymakers and practitioners working on immigrant integration and settlement.

**Bosnia and Herzegovina** Oct 26 2020 This 2017 Article IV Consultation highlights the macroeconomic conditions in Bosnia and Herzegovina (BiH) have remained stable. BiH has made progress in reducing internal and external imbalances in recent years, thanks to a prudent fiscal position, and a strong monetary anchor provided by the currency board. However, job creation has been limited, unemployment has remained high, particularly among the youth, and the income convergence with the European Union has stalled. Fiscal stability has been maintained, mainly through continued restraint on current government spending. Progress in improving budget composition has been limited and reforms of state enterprises have not progressed as envisaged. *The Politics of Controlling*

*Organized Crime in Greater China* Dec 08 2021 In China, the central government has the political will to control organized crime, which is seen as a national security threat. The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments. The development of prostitution, underground gambling and narcotics production has become so serious that the central government has to rely on anti-crime campaigns to combat these "three evils". This book explores the specific role of government institutions and agencies, notably the police, in controlling organised and cross-border crime in Greater China. Drawing heavily on original empirical data, it compares the both the states of the People's Republic of China and Taiwan, as well as city-states Hong Kong and Macao. This region has become increasingly economically integrated, and human interactions have been

enhanced through improved trade relations, tourism, and increased individual freedom. The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation as well as anti-crime campaigns. It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political-criminal nexus. Focusing on regime capacity in crime control, regime autonomy from crime groups, and regime legitimacy in the fight against organized crime, this thought-provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly.

*The Social Contexts of Disability Ministry* Sep 24 2020

This book provides pastors, seminarians, and interested laity with the background necessary to understand the need for disability ministry and the contexts out of which the church's ministry among

people with disabilities must emerge. This is true not only for descriptions of ministries over the past sixty years, but also the challenges disability poses for biblical studies, church history, Christian theology, and ethics. Insights are gained not only from mainstream secular and religious sources but from evangelical and other conservative materials. The blending of items from different religious resources reveals just how ubiquitous disability is and the need for disability ministry--now and for many years into the future. The book's format is such that either it can serve as a text for courses on disability ministry, or individual chapters can be employed in various courses on selected topics in biblical studies, history, theology, and ethics. Pastors and lay leaders will enjoy the depth of coverage for each topic. This is a book about a serious subject, for serious readers. Its materials are designed to inform, stimulate, and promote disability ministry as a topic

worthy of serious study.

**Flight Risk** Dec 20 2022 After 2005, the United States and coalition partners led an air advisory campaign to rebuild the Afghan Air Force (AAF). From the 1920s Afghanistan maintained a smallish air arm

that depended heavily upon outside assistance. After the Soviet withdrawal in 1989, the 1990s witnessed the splintering of Afghan air power among mujahideen groups, and in 2001 U.S. air power neutralized what remained of Afghan air assets. By 2005, U.S.-coalition rebuilding efforts in Afghanistan included the AAF and in 2007 a formal joint / combined entity, led by a U.S. Air Force brigadier general, began air advisor work with Afghan airmen. The AAF expected to grow to 8,000 personnel and 150 aircraft by 2016. Between 2007 and 2011, air advising efforts made modest progress in terms of infrastructures, personnel and aircraft accessions, and various training courses. But by 2010, advisors increasingly viewed AAF command and control (C2) as a problem area that required significant improvement if a professional air force was to be built. In the spring of 2011, major institutional changes to AAF C2 procedures were being introduced when nine U.S. air

advisors were killed. The attack was the worst single-incident loss of U.S. Air Force personnel in a deployed location since 1996 and the worst insider-attack since 2001. The post-attack investigation failed to uncover evidence of organized corruption contributing to the attack despite the well-known presence of a Criminal Patronage Network as well as certain power brokers within the AAF itself (all unacknowledged in the original report). The investigation was the victim of command pressure at the U.S. three-star level. From mid-2011 through 2015, air advisors focused on force protection as well as teaching English, training Afghan airmen, and adjusting U.S.-coalition plans to a shifting AAF inventory. As time wore on, the cultural chasm between Afghanistan and the West became more apparent, highlighted by Afghan senior leaders' traditional practice of personal-based C2 through the use of their cell-phones to re-task most AAF aircraft sorties

(especially Mi-17s) outside of established procedures and C2 entities. Many sorties were invisible to the air advisors, and others were suspected of transporting illicit goods. Under such circumstances, flying training sorties of AAF aviators failed to keep pace with the air campaign plan. In short, culturally informed ways of doing business precluded AAF professionalization. As of 2015, the dilemma continued with no end in sight to an air advisory mission of uncertain long-term value.

The Quest to Cyber Superiority  
Oct 06 2021 This book explains how major world economies are recognizing the need for a major push in cyber policy environments. It helps readers understand why these nations are committing substantial resources to cybersecurity, and to the development of standards, rules and guidelines in order to address cyber-threats and catch up with global trends and technological developments. A key focus is on specific countries' engagement in cyberattacks

and the development of cyber-warfare capabilities. Further, the book demonstrates how a nation's technological advancement may not necessarily lead to cyber-superiority. It covers cybersecurity issues with regard to conflicts that shape relationships between major economies, and explains how attempts to secure the cyber domain have been hampered by the lack of an international consensus on key issues and concepts. The book also reveals how some economies are now facing a tricky trade-off between economically productive uses of emerging technologies and an enhanced cybersecurity profile. In the context of current paradigms related to the linkages between security and trade/investment, it also delves into new perspectives that are being brought to light by emerging cybersecurity issues.

### **The Kurdish Spring** Jan 09

2022 Kurds are the largest stateless people in the world. An estimated thirty-two million Kurds live in "Kurdistan," which includes parts of Turkey, Iraq, Syria, and Iran?today's "hot spots" in the Middle East. The Kurdish Spring explores the subjugation of Kurds by Arab, Ottoman, and Persian powers for almost a century, and explains why Kurds are now evolving from a victimized people to a coherent political community. David L. Phillips describes Kurdish rebellions and arbitrary divisions in the last century, chronicling the nadir of Kurdish experience in the 1980s. He discusses draconian measures implemented by Iraq, including use of chemical weapons, Turkey's restrictions on political and cultural rights, denial of citizenship and punishment for expressing Kurdish identity in Syria, and repressive rule in Iran. Phillips

forecasts the collapse and fragmentation of Iraq. He argues that US strategic and security interests are advanced through cooperation with Kurds, as a bulwark against ISIS and Islamic extremism. This work will encourage the public to look critically at the post-colonial period, recognizing the injustice and impracticality of states that were created by Great Powers, and offering a new perspective on sovereignty and statehood. *Adult Transgender Care* Apr 19

*The Scandalous Presidency of Barack Obama* Feb 10 2022

“I’m proud of the fact that [...] we’re probably the first administration in modern history that hasn’t had a major scandal in the White House.” So President Barack Obama boldly declared before leaving office, and numerous times since. But is it true? Not according to Matt Margolis, bestselling co-author of *The Worst President in History: The Legacy of Barack Obama*. Margolis lays out the details of literally dozens of Obama administration scandals that have been ignored, downplayed, or covered-up by the mainstream media. From “Fast and Furious,” to the illegal IRS targeting of

conservative groups, to the recent NSA spying outrage, Margolis makes a powerful case that the Obama years represented nearly a decade of lawless and abusive governance. While Obama and his allies attempt to spin the narrative that his presidency represented a time of pristine politics, it’s critically important that Americans understand the truth—Barack Obama brought to Washington corrupt Chicago-machine politics of cronyism and corporate payoffs, combined with audacious Alinskyite tactics aimed at dividing Americans and destroying his opponents. Obama’s legacy will be discussed and debated for decades. But in the early months after he left office, more scandals have been uncovered—most notably an illegal scheme of using the NSA to spy on his political opponents and the frightening decision to block the prosecution of Iranian-backed terrorists. Far from being a virtuous New Camelot, the Obama administration abused

its power like few others. Corporate Social Responsibility in the Hospitality and Tourism Industry Jan 29 2021 Increased tourism benefits local economies by creating more revenue and employment options as interest in the location grows. However, as the hospitality and travel industry continues to grow and adapt, it becomes imperative that they implement socially responsible procedures. Corporate Social Responsibility in the Hospitality and Tourism Industry discusses issues and challenges faced by organizations implementing responsible business practices within the travel, hotel, leisure and hospitality industries. Featuring best practices and theoretical concepts on the support of local economies, ethical sourcing of native goods, and sustainability procedures, this publication is a vital source for policy makers, academicians, researchers, students, technology developers, and government officials interested in emergent ethical and moral

practices within the travel industry.

### **Environmental Success**

**Stories** Jun 14 2022 Unlike many titles on environmental issues that portend a dark future, Environmental Success Stories delves into the most daunting ecological and environmental challenges humankind has faced and shows how scientists, citizens, and a responsive public sector have dealt with them successfully. In addition to presenting the basic chemical and environmental science underlying problems like providing clean drinking water, removing DDT and lead from agriculture and our homes, and curtailing industrial pollution, this book also discusses the political actors, agency regulators, and community leaders who have collaborated to enact effective legislation. Sharing the stories of the people, organizations, and governments who have addressed these problems successfully, Frank M. Dunnivant explains how we might confront the world's

largest and most complex environmental crisis: climate change. Now is the time for rededicated scientific exploration and enlightened citizen action to save our environment, and Dunnivant's book offers a stirring call to action.

*Morning Coffee* Mar 11 2022

Full-time Air Force recruiter and part-time youth pastor, Robb Jones's world was filled with people looking for answers, a better tomorrow, or a brighter future.

Overwhelmed with negativism magnified by social media, he found himself seeking a way to make a difference. One morning, enjoying coffee with his friend Alberto, he asked a question. Realizing social media had somehow replaced his grandpa's morning paper, "What if every day it provided something positive or inspirational?" He pondered writing a blog each morning to inspire, encourage, or teach others utilizing the Word of God. New Year's Eve 2013, during prayer, Robb was inspired by the Holy Spirit and committed to spend each morning communing with God. He vowed to take his morning

inspiration to social media in the form of a daily post.

January 1, 2014, the journey began. Over the next 365 days, Robb awoke early, made coffee, and sought inspiration from the Holy Spirit. Posts were personal, inspirational, and often, educational. Some were reflections of past experiences and some were miniature Bible studies. Many included dissection of the written Word and breaking down scriptures over several days. On January 1, 2015, the journey concluded. *Morning Coffee* is not just a collection of scriptures to jump-start your day. It is a real-life journey of a military man walking with God and sharing his experience with the world. It is a man up before the sun, praying, looking for inspiration, and writing before putting on his uniform to go to work. It is personal, inspirational, and educational. Most of all, it is real. It was the most difficult, sacrificial year of his life. It was never intended to be a book; it was only intended to be a tool for God to use to

reach the hearts of His people.

*Nine Days in May* Jan 21 2023

Moving through the jungle near the Cambodian border on May 18, 1967, a company of American infantry observed three North Vietnamese Army regulars, AK-47s slung over their shoulders, walking down a well-worn trail in the rugged Central Highlands. Startled by shouts of “Lai day, lai day” (“Come here, come here”), the three men dropped their packs and fled. The company commander, a young lieutenant, sent a platoon down

the trail to investigate. Those few men soon found themselves outnumbered, surrounded, and fighting for their lives. Their first desperate moments marked the beginning of a series of bloody battles that lasted more than a week, one that survivors would later call “the nine days in May border battles.” *Nine Days in May* is the first full account of these bitterly contested battles. Part of Operation Francis Marion, they took place in the Ia Tchar Valley and the remote jungle west of Pleiku. Fought between three American battalions and two North Vietnamese Army regiments, this prolonged, deadly encounter was one of the largest, most savage actions seen by elements of the storied 4th Infantry Division in Vietnam. Drawing on interviews with the participants, Warren K. Wilkins recreates the vicious fighting in gripping detail. This is a story of extraordinary courage and sacrifice displayed in a series of battles that were fought and won within the context of a

broader, intractable strategic stalemate. When the guns finally fell silent, an unheralded American brigade received a Presidential Unit Citation and earned three of the twelve Medals of Honor awarded to soldiers of the 4th Infantry Division in Vietnam.

*Socialism & Hope* Jul 03 2021

The last few years have seen a Scottish independence referendum, a couple of General Elections and a vote on whether or not we should remain in the European Union. Throw in two uncompromising Labour leadership battles at UK level and a couple in Scotland, and it would be true to say that nothing less than a political whirlwind has swept through the corridors of the Scottish Parliament since it 'reconvened' in 1999.

Following the turbulent six years for which Neil Findlay has been a member of the Scottish Parliament for Lothian, *Socialism & Hope* tracks the highs and lows of his personal and political life. From standing in the 2014 election to become the Leader

of the Scottish Labour Party, to acting as Jeremy Corbyn's Scottish campaign chief in the 2015 and 2016 leadership elections, Neil's political career has been tireless and active. This book, described by Jeremy Corbyn as 'an honest, frank and challenging - as well as humorous of course - account of his time [...] at the forefront of Scottish politics', also includes Neil's inside view on the events of the 2014 Scottish Referendum and the rise of a more socialist Labour Party. With its entertaining narrative, it provides unprecedented and personal insights from within the political sphere itself. As well as surveying the past few years of political tumult, *Socialism & Hope* also looks forward to envision a society transformed by a revitalised Labour movement.

*When Dementia Came*

*Knocking* Aug 04 2021 From what started out as a blog to help me keep my sanity to books to help you keep yours, this is the true story of a mother and daughter caught up in the grips of a ruthless

invader and how it redefined our lives as we knew it and how hope, however fleeting, was attainable. It chronicles the life of my larger-than-life mother as a war, too close to her home, raged in Europe, how love blossomed in the most unlikely of circumstances

and how, years later, after a devastating diagnosis, she was able to keep her amazing wit and undeniable charm. This is a story, like millions of other stories out there, just waiting to be heard. Just one. And what an incredible story it is! This is volume 2, the rest of our story.
