Evidence, policy, impact. WHO guide for evidence-informed decision-making Nov 16 2019 The
importance of evidence-informed approaches in policy formulation and implementation has long
been recognized by the World Health Organization (WHO) and its Member States. With the General

Programme of Work (GPW)13 and the creation of the Science Division, WHO has reinforced its science and evidence-based mandate. This guide offers staff and partner organizations a compendium of WHO tools to successfully leverage evidence for policy and impact, and promote evidence-informed decision-making for safe and effective health policy and practice at country and global levels. Through its framework, the guide will increase awareness and uptake of existing tools and best practices, and additionally facilitate collaboration between areas within the Organization and with partners across countries and regions.

Whole Beast Butchery Mar 01 2021 DIY fever + quality meat mania = old-school butchery revival! Artisan cooks who are familiar with their farmers market are now buying small farm raised meat in butcher-sized portions. Dubbed a rock star butcher by the New York Times, San Francisco chef and self-taught meat expert Ryan Farr demystifies the butchery process with 500 step-by-step photographs, master recipes for key cuts, and a primer on tools, techniques, and meat handling. This visual manual is the first to teach by showing exactly what butchers know, whether cooks want to learn how to turn a primal into familiar and special cuts or to simply identify everything in the case at the market.
