*American Light Trucks and Utility Vehicles, 1967-1989* Nov 17 2022 The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

**The Future of the Profit Split Method** Jan 27 2021 The Future of the Profit Split Method Edited by Robert Danon, Guglielmo Maisto, Vikram Chand & Gabriella Cappelleri Among the various transfer pricing methods, the profit split method (PSM) is under the spotlight after the OECD's Base Erosion and Profit Shifting (BEPS) project. However, both expert analysis and experience indicate that this method is not straightforward either for taxpayers to apply or for tax administrations to evaluate. In this thorough and detailed commentary – the first book to analyse this increasingly adopted transfer pricing method – notable scholars and practitioners working in the international tax community express their views on the method, answering some unresolved questions and highlighting issues that are still open and pending, especially in light of the digitalization of the economy. Crucial issues covered by the contributors include the following: choice of the appropriate splitting factors, their relative weights, and valuation of the contributions; uncertainties and outcomes potentially not aligned with the arm's-length standard; possible role of assessments made by the European Commission on State aid; nexus with the work done by the EU Joint Transfer Pricing Forum; impact of profit split on indirect taxes (VAT/customs tax/excise tax); and application to digital business models and, in general, to the digitalized economy. Moreover, relevant experience of applying this method in France, Germany, Italy, Spain, Switzerland, the United Kingdom, and the United States is provided. A concluding chapter also deals with selected industry experiences. Due to a high level of uncertainty in alignment with international guidance in the application of the PSM – and to the underdeveloped nature of current literature on the subject – there is a need for this book because both tax administrations and taxpayers, going forward, will apply the PSM extensively. The book is highly relevant for policymakers, tax administrations, practitioners and academics engaged in the areas of international taxation, transfer pricing and tax policy.

**Tax Havens and International Human Rights** Jan 15 2020 This book sails in uncharted waters. It takes a human rights-based approach to tax havens, and is a detailed analysis of structures and the laws that generate and support these. It makes plain the unscrupulous or merely indifferent ways in which, using tax havens, businesses and individuals systematically undermine and for all practical purposes eliminate access to remedies under international human rights law. It exposes as abusive of human rights a complex structural web of trusts, companies, partnerships, foundations, nominees and fiduciaries; secrecy, immunity and smoke screens. It also lays bare the cynical manipulation by tax havens of traditional legal forms and conventions, and the creation of entities so bizarre and chimeric that they defy classification. Yet from the perspective of the tax havens themselves, these are entirely legitimate; the product of duly enacted domestic laws. This book is not a work of investigative journalism in the style of the Pulitzer Prize-winning authors of The Panama Papers, exposing political or financial corruption, money laundering or the financing of terrorism. All those elements are present of course, but the focus is on international human rights and how tax havens do not merely facilitate but actively connive at their breach. The tax havens are compromising the international human rights legal continuum.

*International Tax Evasion in the Global Information Age* Sep 22 2020 This book provides a comprehensive analysis of the Organisation for Economic Cooperation and Development's (OECD) war on offshore tax evasion. The authors explain the new emerging regulatory regimes on the global exchange of information to combat offshore tax evasion and analyse why Automatic Exchange of Information (AEOI) is not a "magic bullet" solution. Chapters include coverage of the Foreign Account Tax Compliance Act (FATCA), AEOI and the Common Reporting Standards (CRS), and the unprecedented extra-territorial enforcement by the United States of its tax and reporting laws, including the FBAR provisions of the Bank Secrecy Act. These new legal regimes directly impact nearly all financial institutions and financial service

providers in the U.S., U.K., EU, Canada, and each of the 132 member jurisdictions of the OECD's Global Forum, as well as 8 million U.S. expats. In light of The Panama Papers, this book offers a timely and valuable contribution on the prevalence and costs of international tax evasion for the global financial community, policy-makers, and practitioners alike.

**The Changing Global Order** May 31 2021 This volume offers a comprehensive evaluation of the concept of global order, with a particular emphasis on the role of regional organisations within global governance institutions such as the United Nations. Building from a solid theoretical base it draws upon the expertise of numerous leading international scholars offering a broad array of timely and relevant case studies. These all take into consideration the historical setting, before analysing the contemporary situation and offering suggestions for potential realignments and readjustments that may be witnessed in the future. The volume adopts an interdisciplinary approach when addressing some of the most pressing issues of global governance which our global community must tackle. This presents the readers an opportunity to understand related topics such as political economy, international law, institutions of global governance, in conjunction with the academic field of International Relations (IR). It further helps students and interested readers understand the theoretical and practical foundations to the changing nature of global affairs.

**Charged** Jun 19 2020 Who do the police protect? An investigation into 40 years of battling protest that reveals a hidden police agenda against dissent. Charged is an essential investigation into the role of policing protest in Britain today. As the UK government tries to suppress all forms of dissent, in their pursuit of more control, how do the police manage crowds, provoke violence and even break the law? Since the 1980s under successive governments the police have been allowed to suppress protests, using aggressive tactics—from batons to horse charges to kettling. The landscape of how police deal with protest changed following criticism of the police during the 1981 Brixton riots. New military-style tactics were sanctioned by the Thatcher government, in secret. Over the next forty years those protesting against racism, unfair job losses, draconian laws, or for environmental protection were subject to brutal tactics. In the aftermath, media attention denigrates protesters while the police are praised and continue to act with impunity. Looking through these moments of conflict widens our understanding of policing public order to reveal the true character of the state. Since the 1980s successive governments, from Thatcher to Johnson, covertly plot to suppress protests, using standardised aggressive tactics, from batons to horse charges to kettling. Through undisclosed documents and eyewitness accounts the authors reveal organised police violence against miners at Orgreave, print workers at Warrington, anti poll tax campaigners, student protestors and Black Lives Matter. The voices of protesters have been undeterred.

**Securing Mega-Events** Mar 29 2021 Mega-events such as the Olympic Games, World Cup finals and international political summits are occasions of almost unparalleled economic, political and social significance for host nations and cities. The scale and scope of mega-event security has continued to grow enormously since 11 September 2001, consistently involving the largest policing and security operations for event hosts outside of wartime. This book is the first to focus exclusively on the organisational dynamics underpinning the design and delivery of mega-event security. Using the G20 Summit in Brisbane, Australia in November 2014 as a case study, in conjunction with comparisons with events such as the Toronto 2010 G20, the authors engage in a comprehensive assessment of the networks, strategies and tensions involved in mega-event security. By drawing on the insightful experiences of those responsible for securing the Brisbane 2014 G20, the authors look behind-the-scenes to capture the complexity of mega-event security. The authors argue that such an approach is essential to better appreciate how different conceptions of security, ways of thinking and acting, impact a range of security ideals and outcomes.

**Special Features of the UN Model Convention** Oct 04 2021 Detailed research on the UN Model Convention's unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations. Driven by the aim to achieve consistency in the international tax treaty practice, the structure and content is, to a large extent, similar in the UN Model and the OECD Model. However, whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries, the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention. Compared to the OECD Model Convention, the UN Model Convention aims at giving more weight to the source principle. Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model

Convention 2017 and allows for a withholding tax to be levied on payments to non-residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided. Interestingly, in the discussions of the tax challenges arising from the digitalization of the economy, the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and/or user, i.e., the 'market jurisdictions'. As this has traditionally been the focus of the UN Model Convention, its unique features and developing countries' practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement. This book contains the master's theses of the full-time LL.M. program 2018-2019 for which 'Special Features of the UN Model Convention' has been chosen as the general topic. With this book, the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention, which are explored in detail. This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD's BEPS project on the UN Model.

**International Taxation of Income from Services under Double Taxation Conventions** Nov 24 2020 The provision of international services has increased enormously, mainly due to the precipitous growth of the digital economy. Accordingly, the interpretation and application of double taxation conventions (DTCs) to income from services has become a dominant focus in the international taxation. This multiple-award-winning book is an indispensable tool for practitioners and a major contribution to the debate about tax reform. It responds to the need for a comprehensive overview of the tax opportunities and risks relating to the provision of international services. It also offers the first in-depth analysis of the taxation of income from services vis-à-vis the multilateral instrument (MLI) resulting from the OECD's Base Erosion and Profit Shifting (BEPS) initiative. With the thorough analysis of the international taxation of income from services over the last two centuries, the author sheds new light on present tax policy debates and develops workable proposals for bringing brick-and-mortar DTCs into the digital reality. With an abundance of case studies, treaty interpretations, appraisals of policy discussions, and practical solutions, the author examines every aspect of the subject, including the following: – the Model DTCs of the OECD, the United Nations, Germany, and the United States, their similarities and differences; – relationships among the MLI, the Model DTCs, and specific DTCs; – development of the provisions dealing with services in the DTCs; – how tax authorities and courts of different countries (e.g., the United States, Germany, Brazil, India, and China) apply DTC provisions on the taxation of international services; – opportunities and risks relating to different business practices, such as the subcontracting of services provisions, the hiring-out of labour, the secondment of employees, and the engagement of contract and toll manufacturers; – practical questions about the taxation of different distribution models – from fully edged distributors to commissionaires; – challenges and proposals relating to the differentiation between various types of services under DTCs; – the permanent establishment concept; – to what extent the structure, purposes, and scope of DTCs differ from those of the General Agreement on Trade in Services (GATS); – how changes in the US Model DTC of 2016 affect international service provisions; and – proposed changes to amending the OECD and UN Model DTCs. Viable proposals to simplify DTC provisions dealing with service income and align them with current challenges such as the digital economy and the increasing volume of remote services are offered, particularly in light of the likely impact of the 'BEPS package' and its subsequent MLI. This book is poised to become one of the key practice resources for tax lawyers, in-house counsel, and policymakers in the coming years. Interested academics too will benefit from the author's skill in recognizing the ongoing role of taxation fundamentals in the major revolution currently underway.
